Grapevine

June, 2024

What is the Grapevine?

The *Grapevine* is a free monthly e-newsletter intended to help inform North Bay Area educators about science and environmental education resources, events, opportunities, etc. To receive the *Grapevine*, just send an email asking to be added to the *Grapevine* email list to: mroa@sonic.net

Please share this information with whomever might be interested, and if you find out about something that should be shared among science and environmental educators, please let me know.

If you would like to have your event or other science or environmental education opportunity included in the Grapevine, send me an email with a short announcement that I can cut and paste. Send to: mroa@sonic.net Submissions are usually due on the 25th of the month. I plan to send the Grapevine the around the first of each month. (See Submission Due Date below.)

***If you represent an organization** and would like to write your own (short) description, that would be GREAT. If you offer opportunities for volunteering or citizen science, please **be sure to note that.**

To unsubscribe, just send me an e-mail asking to be dropped from the Grapevine list.

Past issues of the Grapevine are being archived at the North Bay Science Discovery website at:

<https://www.northbayscience.org/grapevine>

Submissions Due:

Submissions for the next *Grapevine* are due **June 27**. The next issue will include events through approximately **July 16**.

Interested in a JOB? Have an opening to advertise? See the JOBS section following the articles.

Are you changing jobs or retiring?

- If you want to continue to receive the *Grapevine*, please be sure that I have an email address that will get it to you after you change jobs or retire.
- If you no longer want to receive the *Grapevine*, please let me know that so I can delete your email address.
- **In either case, if there is somebody else at your school or organization that should receive the *Grapevine*, please have them contact me.**

Sharing...resources, information, opportunities

A great free science newsletter and calendar is “SciSchmooze.” Contact Kishore Hari at:

Sonoma Co. Radio Amateurs

ARRL Field Day

ARRL Field Day is the most popular on-the-air event held annually in the US and Canada. On the fourth weekend of June, more than 35,000 radio amateurs gather with their clubs, groups or simply with friends to operate from remote locations.

Sonoma County Radio Amateurs will be participating in Field Day:

SCRA will be demonstrating Morse Code, Continuous Wave CW.

There will be a station available for the general public to have an opportunity to talk on radio.

This includes a contest to see how many different modes, ways, that we can make contacts...QSOs.

There will be demonstrations of different digital modes of communication.

Field Day is a 24-hour event. Starting June 22nd at 11:00 AM through 11:00 AM June 23rd.

The location for Field Day will be Youth Park 1701 Fulton Rd. (Across from Piner High School)

This is the website for [Sonoma County Radio Amateurs](#)

Sudden Oak Death Blitz Now through June 14

Complete the training online and then mail in leaves

Test your trees for free & help science! Registration *REQUIRED*:

[Register \(by Friday, June 7 to receive packets by mail\):](#)

ucanr.edu/2024sodblitz

- 30 min online training
- Receive sample packets - mailed to you, or pick up at the [UCCE Sonoma office](#) (133 Aviation Blvd Ste 109, Santa Rosa 95403)
- Submit bay & tanoak leaves for testing - postmark by June 17

iCode Day Camp

sponsored by University of California 4-H program:

Learn computer science with unplugged, Scratch, and micro:bit coding through identity, culture, and creativity.

June 10-13, 2024, 9:00 a.m. to 3:00 p.m. at Cali Calmécac in Windsor.

For students in 6th to 8th grade.

Register for \$50 at <https://surveys.ucanr.edu/survey.cfm?surveynumber=36274>

Questions, please reach out to Miguel Delgado at delgadochavez@ucdavis.edu or 707-565-2681.

Sturgeon's Sawmill

Sturgeon's sawmill is a 100+ year old steam powered sawmill. It is located in Sebastopol. They fire it up for free weekend "Demonstration Runs" four times a year. They also have a couple of Student Education Days at which students can "step back into history. For information, go to their website at sturgeonsmill.com This year's Demonstration Runs are:

June 15-16, August 3-4, and September 14-15

(Coast Redwoods) Forest Stewardship Webinar

Wednesday, June 12, 6:00 p.m. – 8:00 p.m.

The Forest Stewardship Program is hosting a special session focusing on coast redwoods with UC Extension Specialist Kristin Shive; UC ANR Fire Advisor Cleo Aster Woelfle-Hazard; and UC ANR Forestry Advisor Brian Woodward.

Join the webinar to learn more about coast redwoods, including:

- Coast redwood ecology and management pre-fire disturbance;
- Coast redwood ecology and management post-fire disturbance; and
- Future climate predictions and fire planning for coast redwood forests.

Registration is free. Sign up at:

<https://surveys.ucanr.edu/survey.cfm?surveynumber=42639>

For questions, contact Kim Ingram, kcingram@ucanr.edu,

or Katie Reidy, kkreidy@ucanr.edu

**New resource for teaching about climate change:
Teaching about Climate Change with PLT, Project WET, and Project WILD**

Understanding climate, including how it is changing and how that impacts the environment, is crucial to making informed decisions and building resilience. Project Learning Tree, Project WET, and Project WILD provide over 100 hands-on activities grounded in each of our environmental focuses.

[Learn More](#)

**For High School Youth - ages 13+
NOAA Young Changemakers Fellowship**

Through the program, high school students from the United States, U.S. territories, and tribal nations build skills around creating change in their home communities, culminating in a self-designed action project. In addition to taking local action, the changemakers also learn about and provide NOAA leadership with their perspective on large-scale issues such as the climate crisis, ocean issues, environmental justice challenges, and more.

Fellows take part in an in-person summit in D.C. in the summer and virtual meetings throughout the school year. These meetings include everything from project planning workshops to communication training to roundtable discussions with NOAA leadership.

Together, these opportunities help fellows turn their passion for ocean and environmental topics into concrete action, all while helping NOAA better understand the perspectives of young people.

In return for full program participation, each fellow receives:

- a stipend (\$800).
- funding to support their action project (up to \$750).
- one-on-one mentorship with a NOAA employee.
- an all-expenses-paid kickoff summit in Washington, D.C. (July 23-27, 2024).
- [How to Apply](#) - Deadline June 10, 2024

California Native Plant Society, Milo Baker Chapter

Invasives Talk of Weeds, Wildflowers and Words We Use, with David Self

In person and on Zoom (Link at chapters.cnps.org/Milobaker)

Tuesday, June 18, 2024, 7:30 P.M. at Luther Burbank Art and Garden Center, 2050 Yulupa Ave., Santa Rosa

David will share a few stories, metaphors, phrases and models that tussle with our notions of "native, non-native and invasive plants" and of "nature and culture."

U.C. Environmental Stewards classes (Ca. Naturalist and Climate Stewards)

For more info about the U.C. Environmental Stewards, or to sign up for their e-newsletter, email: ucenvironmentalstewards@ucanr.edu

California Naturalist course at College of the Redwoods (Humboldt County) starts August 24

If you are interested in taking Climate Stewards and working in an action-oriented manner towards building climate resiliency, check out these excellent Corps positions. Part of all of these programs includes becoming a certified Climate Steward, and they are currently accepting applications.

Looking for a local wildlife scientist or photographer...

...to do a short (45 minute) presentation at a summer wildlife conservation camp called *Get Wild!*. The camp will be held on the San Domenico campus in San Anselmo during the weeks of June 17 (38 students ages 4-7) and June 24 (20 students ages 8-10). Flexible day of the week and time of day during either week, as long as we plan ahead.

Reasonable travel costs can be reimbursed, or a stipend of \$100 can be provided.

Reach out to Lower School Science Specialist, Cyndi Trapanese at ctrapanese@sandomenico.org

High Schools: Announcing pre-registration for Forestry Challenge - Fall 2024

Event is FREE!

High Schools: Announcing pre-registration for Forestry Challenge - Fall 2024

Four event locations, one nearby, three others farther away:

Santa Cruz - October 9 to 12 - Redwood Glen near Loma Mar

Shasta - September 25 to 28 - Mountain Meadows Camp east of Redding

El Dorado - October 23 to 26 - Leoni Meadows Camp south of Placerville

San Bernardino - November 6 to 9 and 13 to 16 – Hume SoCal near Lake Arrowhead

The Forestry Challenge is an academic event for high school students in technical forestry and current forestry topics. Participants spend four days in the forest learning about the ecology and management of the forested

landscapes that provide communities with water, recreational opportunities, wood products, and wildlife habitat. You can now complete pre-registration for any fall event in less than 5 minutes with our online form. For more about the program, visit the Home page of the Forestry Challenge website. There is no registration fee and substitute teacher and transportation assistance are available on an as-needed basis. School groups (typically 4 to 10 students and a teacher chaperone) are welcome to attend any event that is the best fit for location, school schedule, and interest.

Watch a one-minute [introductory video](#)!

Monthly e-newsletters: Our College & Career and Teacher e-newsletters are a great way to stay informed on a variety of opportunities, from scholarships to internships, and from curriculum ideas to professional development. To subscribe, [click here](#) for the College & Career newsletter and [click here](#) for the Teacher newsletter.

Also, check out our [Careers in Forestry page](#) on the website for lots of great information. If there is anything else we can help you with, please don't hesitate to email me.

CA. Mathematics, Science and Computer Science Partnership

CAL-MSCS Trending Tuesdays (4-5PM)

Join us to learn more about the California Mathematics, Science, and Computer Science Partnership (CAL-MSCS). Experience engaging learning sessions led by our content leadership teams and partners. Explore topics impacting mathematics, science, and computer science education and implementation.

Suggested Audience: Open to all educators, leaders, and partners passionate about the intersections of MSCS education

First session: April 30, 2024 (4-5pm)

Our first session will explore the overall structure and vision of CAL-MSCS. We will discuss opportunities to connect and provide professional learning in mathematics, science, and computer science.

Future sessions:

June 4th (Computer Science)

June 18th (Family and Community Engagement)

Zoom Link to attend all sessions (no registration necessary): <https://bit.ly/TrendingTuesdays>

More information about CAL-MSCS is available on the CAL-MSCS website at: <https://bit.ly/CAL-MSCS>

For questions about the CAL-MSCS, please contact the San Joaquin County Office of Education's CAL-MSCS team via email at: calmscs@sjcoe.net

Sonoma State Historic Park June 2024 Events

June Kicks off State Parks Week June 12-16, 2024. Visit: CaStateParksWeek.org for more information.

Campfire Program Sonoma ~ Saturday, June 8th 6:45pm-7:45pm

Come out and kick off summer with a campfire along with songs, and marshmallow roast at our monthly program. This is an experience that's fun for everyone! Enter through the wooden gates and proceed into the Sonoma Barracks Courtyard for a short educational talk, singing a few traditional tunes, and a tasty marshmallow/s'mores roast! All ages welcome, free of charge.

Fire Prevention-Safety Day at Sonoma Historic Park. Saturday, June 15th 11:00am-3:00pm

Our special guests will be CAL FIRE. They are bringing out some heavy equipment for this event. The large vehicle will be a tractor trailer with a Fire (Bull) Dozer. A wildfire engine and hand crew will also be demonstrating how they run hose, "charge the line" and put water on a simulated grass fire and more! This is a free event program. No reservation required. Kids will be able to use a fire hose too! The program will be in the Casa Grande courtyard and in the rear parking lot. Possible other special guests!

Lecture: The California Serengeti. Thursday, June 20th. The Chapel Mission San Francisco Solano. A lecture by: Breck Parkman. Breck, a former CA State Parks Anthropologist and Historian, will take us back in time and look at what the Sonoma Valley was like at the end of the Ice Age. Admission: \$10.00 at the door. (Doors open @ 6:30pm).

Forestry Institute for Teachers

Every year I encourage *Grapevine* readers to sign up for the Forestry Institute for Teachers. Early registration is now open for the summer, 2024 sessions. I can't recommend it highly enough. It is an excellent and enjoyable weeklong workshop that will help you understand forests and forestry, which is important for those of us who want to protect the forests. I

Registration is now open for the Forestry Institute for Teachers (FIT) 2024 summer sessions! FIT has proudly supported California educators for 30+ years to learn about the state's forests in an immersive week-long professional learning program. At FIT, cohorts of educators work alongside natural resource professionals and credentialed instructors to explore the complexities of stewarding our forest ecosystems for current and future generations. FIT's Natural Resource and Education teams weave environmental education curriculum with field-learning experiences that are relevant to participants' daily lives and communities. Participants ultimately leave FIT empowered to share their learning in ways that enhance and support their current teaching practice.

PreK-12 educators of all subject matters and teaching settings (formal and nonformal) are encouraged to participate. Consider attending with colleagues from your school site or district to enrich your experience. Registration fee covers food, lodging and teaching materials.

Participants receive: **50 hours of interdisciplinary instruction** aligned with state teaching standards and frameworks, **certifications** in Project Learning Tree (PLT) and Project Water Education Today (WET), and upon program completion become eligible for a **\$300 stipend, 3 Continuing Education Units (CEUs)** and future specialized FIT professional learning opportunities exclusively for FIT Graduates!

For more information & registration steps please visit <https://www.forestryinstitute.org>

2024 Sessions:

- **El Dorado: June 16-22: Blodgett Forest, Georgetown**
- **Tuolumne: June 23-29: Sierra Outdoor School, Sonora**
- **Shasta: June 30-July 6: Camp McCumber, Shingletown**
- **Humboldt: July 14-20: Cal Poly Humboldt, Arcata**

[**Early Bird Registration OPEN**](#)

From the Forestry Challenge Teacher Newsletter:

Headwaters Science Institute is offering overnight science camps in July for students going into 7th-12th grade. Campers will camp at Webber Lake Campground near Sierraville, California. Campers will work in small groups to develop questions about water quality, insect biodiversity, and forest structure, and develop their questions into a research project. Campers will also have time to swim in Webber Lake, hike the trails in Lacey Meadows, and form new friendships with fellow campers.

This all-girls cohort will run July 5th - 8th and is aimed at empowering female-identifying students to engage with scientific research. The mixed-gender cohort will run July 9th-13th. For more information and to register, visit <https://headwatersscienceinstitute.org/science-camp/summer-camps/>

Environmental Solutionary Teacher Fellowship 2024-25 Summer Institute

July 15 - 18, 2024

For the last nine years, the Environmental Solutionary Teacher Fellowship has successfully transformed teacher practice to incorporate solutions to climate change while meeting the content standards and fostering student engagement. This year, the program will incorporate the best of ESTF: providing teachers with a robust, solutions-based experience that interweaves nature-based healing practices, social emotional learning, and climate science with environmental literacy. The fellowship will include classroom and outdoor nature experiences and is available to K-12 teachers in every subject area. At different times in the program, participants will have the opportunity to connect with colleagues in smaller, more job-alike settings: K-2, 3-5, 6-8 and 9-12 by subject area. Special focuses this year are on English-Language Arts and ways to incorporate environmental literacy strategies in all subject areas!

[**REGISTER HERE...**](#)

Free *Pacific Coast Tree Finder*

Hi teachers, we are giving away some Pacific Coast Tree Finder dichotomous plant key booklets. These booklets are from our collection and have been used by our students at Forestry Challenge for many years. Some have water damage and loose pages, but are all fully functional. If you are interested, please email Diane (dianedealeyneill@gmail.com) to let us know. We are happy to send these out at no cost to you, but only have a small handful to distribute, so act fast!

Educational Tours Offered By Mendocino Companies

Press release from Humboldt [Mendocino Redwood Company](#):

With a culture rooted in environmental stewardship and community engagement, the Mendocino Companies are proud to offer Education Tours to high school and college students in Sonoma, Lake, Mendocino, and Humboldt Counties. **Tours will be available at our Ukiah and Scotia facilities in the Spring and Fall.** Tours will be limited to 20 or fewer participants at a time and include lunch and all personal protective equipment (PPE). Additional details will be provided upon request to interested parties. [READ MORE...](#)

Madi Daniels, Forestry Challenge Alum, has created a **podcast that takes you on a journey through the heart of reforestation and the battle against climate change!**

Look the podcast up on Spotify, Apple, or YouTube and enjoy!

"California's Watershed Healing" Documentary

Produced by The Chronicles Group, ["California's Watershed Healing"](#) is a documentary that presents the threat of climate change, wildfires, and more. The 56-minute documentary further establishes the reality of current conditions of the forest and also presents viable solutions that can be implemented to benefit forest health.

Forestry Curriculum

Washington Department of Natural Resources (DNR) manages roughly 5.6 million acres of forest, range, agricultural, aquatic, and commercial lands across Washington. In addition, they protect 13 million acres of forest land from wildfire.

To learn more about the work that DNR does and the natural resources that make Washington so special, explore some of the activities linked [here!](#)

Extra Credit Opportunity for High Schoolers!

Cal Poly is offering a handful of Webinars centered around ecology that can be used as an extra credit opportunity for High Schoolers. Below, you will find a list of Webinar topics and their registration links!

1. [CalVTP in Practice: Learning from Pile Burning and Broadcast Burning at Berkeley Forests' Grouse Ridge VTP Project](#)
2. [CalVTP in Practice: Navigating the CalVTP Consultation Process with the California Department of Fish and Wildlife](#)
3. [Collaboration in a Forest Health Grant: Insights from the Los Gatos Creek Watershed Collaborative](#)

Citizen Science Short Course

"Welcome to the Participatory Science Short Course. This three-part, online, asynchronous training introduces the concepts, benefits and methods of participatory science to extension and education practitioners. The [UC California Naturalist Program](#) (UC Division of Agriculture and Natural Resources) and the [Center for Community and Citizen Science](#) (UC Davis School of Education) collaborated to produce the series.

These online trainings include: 1) an introduction to the basic elements of participatory science; 2) a review of examples of how participatory science is currently being used in various UC ANR and UC Cooperative programs; and 3) creating collaborative and co-created projects, with examples from UCANR and an emphasis on ensuring meaningful participation."

[Get more info here!](#)

Vernal Pools, Critters and Plant Learning Resources Available!

Splash believes that every child should be able to have an experience in nature during each grade throughout their TK-12 public schooling. Through their website, they have amazing resources for teachers, students and families interested in California ecology.

Check out these resources [here!](#)

FireWorks materials

FireWorks provides students with interactive, hands-on materials to study wildland fire. It is highly interdisciplinary and students learn about properties of matter, chemical and physical processes, ecosystem fluctuations and cycles, habitat and survival, and human interactions with ecosystems. Students using FireWorks ask questions, gather information, analyze and interpret it, and communicate their discoveries.

Check out the FireWorks curriculum for the Sierra Nevadas [here!](#)

Natural Inquirer Learning Modules

These lesson plans are an amazing way to get all age groups involved in environmental sciences! Topics range from "Invasive Species" to "Freshwater".

Check out Natural Inquirer's Learning Modules [here!](#)

FireBright Wildfire Curriculum

"We recognize that young adult students are active community members and future professionals and homeowners. Any effective, long-term strategy for community resilience in the face of wildfire must bring students into the conversation to help create a cultural awareness of our wildfire-adapted environment while giving some of those students career path opportunities. To this end, we have developed the FireBright Wildfire Curriculum consisting of five fully developed modules."

Check out all of the modules [here!](#)

BODEGA MARINE LABORATORY **invites you to join us for public tours on Friday afternoons!**

IMPORTANT:

Due to limited capacity, you must reserve a date and time to take part in a tour. Additional dates will be added soon. To reserve your spot [visit:](#)

<https://www.eventbrite.com/e/public-tours-of-bodega-marine-laboratory-registration-622690533147>

About the Event:

When: Fridays, starting at 2pm

Where: 2099 Westshore Rd. Bodega Bay, CA 94923

What will I see?

These tours are led by our wonderful crew of ocean-loving docents, and visitors will learn about ongoing marine and coastal science research at Bodega Marine Laboratory and its history on the Sonoma Coast. Plus, you'll get to meet a variety of colorful and diverse ocean creatures.

Who's invited?

Although we welcome all ages, these tours are best for people who are school-aged and above. Dogs and other pets are not allowed, with the exception of service animals.

Public tours are only available by reservation. If your preferred tour time is already full, you can place your name on a waitlist through Eventbrite to claim a spot if one becomes available.

If you are interested in arranging a tour for a school or other group of 10 or more people, please contact alcarranza@ucdavis.edu instead of booking through the public tour reservation system.

What else should I know?

As you drive up to the lab, please be mindful that we are on the Bodega Marine Reserve, a protected home for many marine and terrestrial creatures. We ask that you reduce your speed to the posted limits and watch out for wildlife.

While on the tour, please stay with your group and do not explore on your own, as parts of the laboratory and

reserve contain sensitive organisms and research data that are easily damaged.

Does the tour cost money?

We provide our public tours free of charge, but donations are encouraged and appreciated. Donations are critical to supporting the care and maintenance of the aquaria and animals you will see during your tour.

If you would like to make a gift, you can do so by selecting the donation option when you reserve your tour spot or visit our website to learn about more ways to give: marinescience.ucdavis.edu/give

Some interesting reading:

In the June issue of **National Geographic** :

- “The New Science of Stress”
- “Coral Kaleidoscope”...photos of coral organisms
- “Into the Fire Tubes” (of volcanic lava tubes)
- “Back from the Brink” about the saiga antelope of central Asia
- “Degrees of Change” (cover article) about the effects of the warming ocean in the Gulf of Maine
- “Not so Elementary”...about the discovery and development of knowledge about vitamins

The June issue of **Smithsonian** includes:

- “Tracking our Ancestors” (new dating of footprints in White Sands N.M. gives an age of almost 23,000 ears ago)
- “Earth Quest: What new volcanic caves are revealing about early life on our planet”
- “The Calorie Countess” (Dr. Lulu Hunt Peters, who introduced the idea of counting calories to lose weight)
- “What P:lovers Do”

The Week magazine includes a page of short health and science articles each week. The Mayu 10 issue, for example, had articles titled:

- Traces of bird flu found in pasteurized milk
- Why fewer moths come to lights
- Ultra-rare merged life forms
- Pollution from fires is soaring
- How bees survive floods

The Week is one of my favorite magazines. I recommend it.

TED Talks: Science Worth Knowing:

New science-related talks are frequently posted.

check it out at <https://www.ted.com/topics/science>

Science in the News from Sigma Xi

Sigma Xi is a science honor society. You can sign up to receive their **bi-weekly** science e-newsletter at: <https://www.sigmaxi.org/news/newsletters>

- Evolution may have moved energy to brain from ovaries
- How do hummingbirds hover without touching flowers
- Bioengineering feat could transform vaccine production
- Tattoos may risk raise risk of malignant lymphoma
- PET study links memory loss reports to brain changes
- Crows may share counting, language skills with humans
- A few users dominate Twitter misinformation
- Mental disorders may spread between teenagers

Sci Tech Daily

Sci Tech Daily is a (you guessed it...) **daily** brief summary of current events in a variety of science fields, including general science, health, space, technology and others.

Go to <https://scitechdaily.com/> **Among many others, the xxx edition included:**

- Unlocking reversible male contraception: new research suggests a revolutionary approach
- How depression influences breast cancer survival
- New, young volcano discovered in the Pacific Ocean
- How just 1.5 hours less sleep can damage your heart
- Study finds microplastics in every human placenta
- Over 20 million Americans struggle to regain smell and taste after COVID
- Scientists have discovered new air pollution sources using “Roving Sentinels”

Science Humor:

My high school biology teacher assigned term papers, and graded both the science content and the English. I got graded down on my paper titled “Your Intestines How Digestion Works” because I forgot the colon.

Live and Learn

(in which Mike shares something that he's recently learned.)

A short article in the May 10 The Week magazine told that hibernating queen bumblebees can survive 7 or more days under water!

Hot (Cool?) Links:

SciSchmooze and Bayareascience.org are a great source for information about bay area science events but also for links to podcasts and webinars.

If you go to the link below, you can sign up to receive the free SciSchmooze email.

<https://www.bayareascience.org/calendar/>

Jobs: Stewards of the Coast and Redwoods:

We are accepting applications for:

- [Field Operations Manager](#) (Full-time)
- [Program Assistant](#) (20 hours/week)

Jobs at State Parks

- [Interpretive Senior Park Aide](#) (20 hours/week)

Stewards is an equal opportunity employer and makes employment decisions on the basis of merit. We want to have the best available persons in every job. Stewards policy prohibits unlawful discrimination based on race, color, creed, gender, religion, marital status, registered domestic partner status, age, national origin or ancestry, physical or mental disability, medical condition including genetic characteristics, sexual orientation, or any other consideration made unlawful by federal, state, or local laws. It also prohibits unlawful discrimination based on the perception that anyone has any of those characteristics, or is associated with a person who has or is perceived as having any of those characteristics. All such discrimination is unlawful.

If you are interested in volunteering for one of our environmental education or stewardship programs, please click [here](#).

Scientific Adventures for Girls (SAfG)

[Scientific Adventures for Girls \(SAfG\)](#) is on a mission to revolutionize the way girls engage with STEM from an early age!

They have one available position:

Afterschool STEM Teacher: Teaching credentials? Not required! Passion for shaping future scientists? Absolutely essential! Our classes are not just educational; they're a blast! If you're passionate about fostering a love for STEM and creating memorable learning experiences, we want you on our team.

Part Time Teaching Assistant: In the role of Teaching Assistant, you'll be the backbone of our classroom experiences, collaborating with Head Teachers to deliver inspiring STEM lessons.

Check out the jobs here and [APPLY!](#)

Headwaters Science Institute

Science Mentors and Camp Educators: Headwaters Science Institute is hiring science mentors and educators for summer camps June-August 2024. These instructors will be working with a variety of age groups (5-13 years old). Our programs are located at different field sites around Lake Tahoe.

Part-time Field Science Teacher: As a science mentor, you will assist students with data collection for the research question they will have designed. Methods for data collection will vary based on student questions but will most likely include things like quadrat and transect sampling, soil chemistry testing, water quality measurements, and other simple techniques students will be able to practice in their short time in the field.

APPLY [HERE](#)

Teacher Naturalists at Westminster Woods

We're hiring! Westminster Woods Camp and Conference Center is located on 200 acres of redwood forest in the coastal hills of Western Sonoma County. During the school year, we provide single day and residential overnight environmental and science education as well as character development on our challenge course for students primarily in grades five through eight. Our School Program's mission is to foster the development of character, community, and science literacy in students through experiential outdoor education.

Teacher Naturalists at Westminster Woods are dedicated individuals who are committed to environmental education and experiential learning. Westminster Woods encourages opportunities for growth and professional development and strives to create a learning community.

Now accepting applications for our Fall 2024 cohort of Teacher Naturalists, on a rolling basis.

[See our website for information on how to apply.](#)

Science and Environmental Education Organizations

These organizations offer science or environmental education opportunities and/or **volunteer** or **citizen/community science** opportunities.

If I know of **volunteer** or **citizen/community science opportunities**, I've indicated that, but some may have opportunities about which I don't know.

Check their web sites for more information.

American Cetacean Society

Description: As the name implies, the ACS works to protect cetaceans (whales, dolphins, porpoises), and also supports research.

Web site: The San Francisco Bay chapter's website is: <https://www.acs-sfbay.org/>

Aquarium of the Bay:

Aquarium of the Bay has opened their programming for the 2023-2024 school year. K-12 schools can book either Aquarium-Teacher lead classroom programs (fee-based) or Self-Guided Tours (free, extra chaperones are not included).

Available Programs:

Kinder – Between the Tides: Learn about the animals that live in the tidepool and the adaptations they have to survive their changing world.

1-3rd – Salmon!: Follow the salmon lifecycle from egg to the end and discover how human impacts affect its life journey.

3-5th -Sensational Sea Lions: This outdoor, sense-based program guides students on the scientific journey of wildlife observation. Learn about and observe the World-Famous Pier 39 sea lions. How did they get here, why they stay here, and above all, what makes them such amazing animals.

6-8th – Kraken Lab: Our newest program is quickly becoming very popular with Middle Schools. Come and participate in a squid dissection and learn the ins and outs of this unique animal.

9-12th – 3D Printing Lab: This brief introduction to 3D printing enables your students to learn a little history on 3D printing as well as help print plates that will be used to aid the non-visual community. Note: This program is limited to a maximum of 28 students (2-Sessions of 14 students each, on the same day)

K-12th – VIP School Group Tour: This special tour of the building is held before the Aquarium opens and enables students to see the work that is often not seen by the public. This tour is limited to 25 participants and is not bookable on the website. Please email us for more information

K-12th – Self-Guided Tour: While this tour is booked on 20-minute intervals, the tour length is 1 hour. Your class will be able to go as fast or as slow as you would like which makes it perfect if you only have a limited amount of time.

Email education@bay.org for more information on any of these programs

Visit <https://www.aquariumofthebay.org/> and under the Education tab, find K-12 programs, teacher resources, eLearning modules, Plastic Free Campus, and Professional Learning Courses.

Audubon Canyon Ranch

Our Mission

Connecting nature, people and science in a rapidly changing world

Our Vision

Inspired and informed communities use scientific knowledge to build a resilient, sustainable society that respects the intrinsic value of our natural world.

They have several sites:

- Bouverie Preserve, Glen Ellen
- Cypress Grove Preserve, Marshall
- Martin Griffin Preserve, Stinson Beach
- Modini Preserve, Healdsburg

Volunteer Opportunities: <http://www.egret.org>

Audubon Society

(Madrone Audubon Society Chapter)

We promote public education, enjoyment, study and protection of the natural world, especially birds.

Check out the Madrone Audubon Society's schedule of walks and other events at: www.madroneaudubon.org

The *Madrone Leaves* newsletter has information about coming events and a variety of conservation issues.

Citizen Science Opportunities

Volunteer Opportunities

Bay Area Teen Science

This site posts opportunities for teens to get involved in science in a variety of ways. Although many of the postings are now outdated, they can still provide ideas and sites for teens to check back with later.

California Coastal Commission

Mission: Protecting & Enhancing California's Coast

The Commission is committed to protecting and enhancing California's coast and ocean for present and future generations. It does so through careful planning and regulation of environmentally-sustainable development, rigorous use of science, strong public participation, education, and effective intergovernmental coordination.

Check out these resources from the California Coastal Commission:

Environmental Education Events Calendar

The California Environmental Education Interagency Network maintains a calendar of events and opportunities relating to environmental education. Find an event or submit yours to the calendar.

California Coastal Voices

A project-based learning guide and online toolkit for middle and high school teachers. Consisting of six units (or "projects") that introduce students to coastal conflicts, challenges, and scientific and policy issues, the emphasis is on problem solving and communication. This learning guide was designed to address California's Next Generation Science, Common Core, and History-Social Science standards. Download teacher resources and student activities and access slideshows, videos, articles, and much more.

Find Lots More [Educator Resources](#) online.

website: <https://www.coastal.ca.gov/publiced/pendx.html>

CA. Native Plant Society

The Milo Baker Chapter of the California Native Plant Society (CNPS), named after the famous Santa Rosa Botanist, is located in Northern California's beautiful Sonoma County. CNPS is a statewide organization whose goals are to increase understanding and appreciation of California's native plants, and to preserve them and their natural habitats for future generations. Membership is open to all.

California Naturalist Program

The UC California Naturalist Program is designed to introduce Californians to the wonders of our unique ecology and engage the public in study and stewardship of California's natural communities. The California Naturalist program uses a science curriculum, hands-on learning, problem-solving, [citizen science](#), and community service to instill a deep appreciation for the natural communities of the state and to inspire individuals to become stewards of their local resources.

The mission of the California Naturalist Program is to foster a diverse community of naturalists and promote stewardship of California's natural resources through education and service.

The California Naturalist Program promotes environmental literacy and **stewardship** through **discovery** and **action**. Many other states have similar naturalist programs, but this is the first statewide program in California. To [become a certified California Naturalist](#), participants need to enroll in a 40+ hour course with one of [our partner organizations](#).

We work with over 45 partner organizations that deliver the course and have certified a community of over 2800 Naturalists around the state who have, in turn, volunteered over 175,000 hours in service to nature in the areas of education and interpretation, stewardship, citizen science, and environmental program support. Courses combine classroom and field experience in science, problem-solving, communication training and community service. Students are taught by an instructor and team of experts who are affiliated with a local nature-based center or natural resource focused agency. Upon completing certification requirements, participants are eligible for four academic credits through [UC Davis Extension](#) for an additional nominal fee.

Some CalNat programs are offering online or hybrid programs. See below.

has a high school program called eco2school. Check it out at: <http://www.eco2school.org>

Children's Museum of Sonoma County

<http://www.cmosc.org/>

Mission

The Children's Museum of Sonoma County inspires curiosity and creativity through joyful, transformative experiences.

About Us

The Children's Museum of Sonoma County (CMOSC) was founded in 2005. Rooted in current early childhood research, CMOSC engages children in joyful discovery experiences that develop foundational skills, create lasting memories, and spark a lifelong love of learning.

Designed for children and their caregivers, the Children's Museum's experiential exhibits emphasize hands-on engagement and learning through play with a focus on art, nature, and science.

The Children's Museum proudly supports the work of parents, caregivers, and educators in raising happy, healthy, and strong children. Since opening its doors in 2014, it has become a valuable cultural resource and destination for Sonoma County.

Coastwalk California

Mission

To ensure the right of all people to reach and responsibly enjoy the California coast. We are a California-wide non-profit volunteer driven organization that advocates for public access to our coast via the California Coastal Trail and offers educational & fun Coastal Trail guided hiking and camping adventures.

Vision

A well-stewarded California coast, highly prized as an irreplaceable commons, open for responsible use to all.

www.coastwalk.org phone: 707-829-6689

Community Resources for Science

CRS helps teachers build on that enthusiasm and bring meaningful science learning experiences to life in their classrooms. Children have a natural curiosity and a craving to learn. CRS works to nurture that learning by connecting classroom teachers with scientists, museums, enrichment providers, and professional development programs in order to bring more science learning experiences to students. CRS also helps individuals and organizations involved in science education to work together and become stronger partners for teachers and schools.

We have compiled some resources for teachers that we thought might be useful as we face school closures and move to more online learning opportunities while we practice "social distancing" in the wake of the spread of COVID-19.

<https://www.crscience.org/>

Community Soil Foundation

Student-Grown Farm Stand

Community Soil Foundation's mission is to cultivate the wellness of Sonoma County communities by offering land-based education, creating access to organic produce, and regenerating habitat and natural resources. We invite you to come to the Larkfield Community Garden & Learning Center every Wednesday afternoon for your weekly supply of nutritious, organic produce. All fruits, veggies, and flowers are grown by Mark West students and community volunteers using biodynamic and sustainable methods, with proceeds helping fund the garden. All sales are by donation. Look for our Farm Stand at 450 Noonan Ranch Lane and check out other happenings at www.communitysoil.org.

Volunteer Opportunities

CREEC

The California Regional Environmental Education Community (CREEC) Network is a program of the California Department of Education. The CREEC Network fosters regional partnerships throughout the state of California to promote environmental education and environmental literacy by providing teachers with access to high quality professional learning opportunities and education resources.

Along with statewide sponsors and partners, each of the 11 California CREEC Regions provides professional learning opportunities and resources to educators as well as foster communications among schools and organizations interested in supporting the environmental literacy of California’s teachers and students. More information on the CDE’s CREEC Network program is posted on the [CDE website](#).

Different areas of the state have different CREEC Regions. For information about events in your region, go to: www.creec.org, and select “regions” at the top

Daily Acts

Who We Are

We are a holistic education nonprofit that takes a heart-centered approach to inspiring transformative actions that create connected, equitable, and climate resilient communities. We believe in the power of our daily actions to reconnect people to self, community, and place, which helps to heal our society and planet.

Our Mission is to inspire transformative action that creates connected, equitable climate resilient communities.

Our Vision is to create healthy, just and sustainable communities built upon the daily actions of many people.

East Bay Regional Park District

The East Bay Regional Park District is a system of beautiful parklands and trails in Alameda and Contra Costa counties to the east of San Francisco. The system comprises nearly 125,000 acres in 73 parks, including over 1,250 miles of trails and 55 miles of shoreline. We acquire, manage, and preserve natural and cultural resources for all to enjoy now and into the future. Our parks are ideal for healthful recreation and environmental education. We invite you to enjoy hiking, biking, picnicking, horseback riding, camping, fishing, boating, golfing, and nature study in our parks. [General Brochure](#) [PDF]

<https://www.ebparks.org/>

Education and the Environment Initiative

Who We Are

The California Education and the Environment Initiative is a program of CalRecycle's Office of Education and the Environment (OEE). Our mission is to foster environmental literacy among all California students as part of a high-quality K-12 education. Environmental literacy builds critical thinking and analytic skills that prepare students to make informed decisions about issues affecting our world, and readies them for college and career success.

Our key environmental literacy implementation partners include the California Department of Education's [California Regional Environmental Education Community Network](#) and [Ten Strands](#), a nonprofit organization that supports environment-based learning

<https://www.exploratorium.edu/>

Forestry Challenge

The Forestry Challenge is an academic event for high school students in technical forestry and current forestry topics. Since its inception in 2003, the program has grown from one event to five, a complete buildout of the program in California.

Participants spend four days in the forest learning about the ecology and management of the forested landscapes that provide communities with water, recreational opportunities, wood products, and wildlife habitat. Youth benefit by better understanding the relationship

of the forested environment to their community, by exposure to natural resource management as a potential career option, and by undertaking a rigorous critical thinking exercise which is timely and addresses current forestry topics such as wildfire, insects, and forest health.

Watch a one-minute [introductory video!](#)

Friends of Five Creeks

All-volunteer Friends of Five Creeks works hands-on for clean water, healthy watersheds, and natural areas that welcome both wildlife and people, from Berkeley to Richmond on the urbanized east side of San Francisco Bay.

Volunteer Opportunities

<http://www.fivecreeks.org/>

Friends of the Petaluma River

WHO WE ARE

In 2005 Friends of the Petaluma River was formed to connect our community with the wonders of the Petaluma Watershed. While much of our work is focused on conservation and education surrounding this sensitive habitat, we also believe that celebration plays a large role in our mission. Through events at the River Heritage Center, family programming around the Watershed and access opportunities for the public we bring our Watershed to life.

Our Mission

Our mission is to celebrate the Petaluma Watershed through education and stewardship; because every great River needs a true Friend.

Our Goals: Access, Education, and Conservation

- To pursue outreach and educational activities that will nurture enthusiasm and commitment in the watershed for long term sustainable stewardship.
- To monitor conditions and engage in activities that will reduce or prevent pollution and lessen other harmful impacts on the River and its wetlands.
- To foster a River Heritage Center as a community resource. A place to archive information, host events, administer programs, and coordinate river related activities.
- To promote access to the Petaluma River and Marsh for all community members to experience the beauty of this resource for themselves

*Are you incorporating environmental education into your classroom?
Or would you like help developing and implementing a project about the Petaluma Watershed?
Let the Watershed Classroom support you!*

Green Schoolyards America

Green Schoolyards America seeks to transform asphalt-covered school grounds into park-like green spaces that improve children's well-being, learning, and play while contributing to the ecological health and resilience of our cities. We are working to change the norm for school ground design, use, and management so that all children will have access to the natural world in the places they already visit on a daily basis.

Our programs support the living school ground movement, build relationships that help it succeed, and work to embed this perspective in our existing institutions and policy and regulatory frameworks.

<http://www.greenschoolyards.org/>

Headwaters Science Institute

The Headwaters Science Institute provides science and environmental education through student-driven research. It is headquartered in Soda Springs. They offer some high school programs for which they charge, but also provide some free online learning opportunities.

Planet Bee Foundation

Planet Bee Foundation is a 501(c)(3) environmental education nonprofit currently offering [virtual E-STEM lessons](#) centered around bees at **NO OR VERY LOW COST** in response to the pandemic. We have virtual live lessons with certified teachers or interactive asynchronous video lessons. We served over **20,000 students** around the country in 2020. [Watch our trailer on YouTube.](#)

Our comprehensive distance-learning program can be tailored to the needs of your classroom curriculum with differentiated activities that align with the **NGSS and the Common Core**.

99% of our virtual lessons have been provided at no cost in our dedication to social justice. Our pricing (if any) and sliding scale are listed [here](#).

Volunteer Opportunities

Please feel free to reach out with questions to programs@planetbee.org.

Point Reyes National Seashore

Point Reyes National Seashore Association's *Science at the Seashore* field trip program for school groups.

Join Us for Hands-On Discovery in Point Reyes!

Students have the opportunity to experience the excitement of discovery in natural habitat, improve science skills, increase awareness and inspire stewardship of our environment. Field trips are held in the restored Giacomini Wetlands, surrounding watershed creeks, or Point Reyes bays and beaches. Study equipment and waterproof footwear are provided; Minimum group size is 10 students; Some activities are season, tide, and group-size dependent; A fee is requested, but scholarships are available!

Hands-on activities include: Aquatic macroinvertebrate sampling, Wildlife tracking, Terrestrial invertebrate sampling, Water quality testing, Fish sampling, Bird surveys, Wetland plant studies, Soil and sediment studies, Habitat restoration, Creek profiling and hydrology, Sandy Beach Mole Crab Monitoring (LiMPETS), Marine debris surveys, Drakes Estero paleo geology and biology.

Sonoma Ecology Center and Sugarloaf Ridge State Park’s Team Sugarloaf

Sonoma Ecology Center works to address challenges related to water supply and quality, open space, rural character, biodiversity, energy, climate change, and a better quality of life for all residents. Since 1990, we've worked to increase appreciation and stewardship of Sonoma Valley's natural heritage and create measurable benefits in areas of land, water, climate change and biodiversity.

Vision

We envision a future where people, land, water, and wildlife thrive.

Mission

Our mission is to work with our community to identify and lead actions that achieve and sustain ecological health in Sonoma Valley.

Robert Ferguson Observatory:

Robert Ferguson Observatory is continually looking for new docents and volunteers of all ages to help bring the universe to the public. The Observatory is run by the Valley of the Moon Observatory Association, a 501(3)(c) non-profit, and has offered outreach-based astronomy and science programs to the public for almost 25 years. RFO is almost all-volunteer run and typically serves about 9,000 visitors annually. The observatory is located in Sugarloaf Ridge State Park and houses a 40-inch reflector telescope, the largest telescope in Northern California that is accessible to the public; a robotic 20-inch research-grade, "CCD" telescope; and an 8", two-meter long refractor telescope. Prior experience or knowledge in astronomy is not necessary. Please go to rfo.org, click on "Volunteer" and fill out the volunteer application form online to get on the list for our next docent orientation and training! Questions? Contact Stephanie Derammelaere at 707-333-1331 or at sd@rfo.org.

Volunteer Opportunities

Sonoma Land Trust

The Sonoma Land Trust offers a variety of educational outings and volunteer opportunities for the public on protected lands. Check them out at: <https://sonomalandtrust.org> (select the "Explore" tab for the calendar)

Volunteer Opportunities

Citizen Science Opportunities

Sonoma/Petaluma State Historic Parks

While the Sonoma/Petaluma area state Parks primarily focus on history, they do have some science/environmental events and offerings such as twilight nature hikes.

For info, go to www.sonomaparks.org

Sonoma State University:

The Sonoma State University School of Science and Technology has a periodic online newsletter that gives news about the school and includes a link to the various department public speakers and events.

The link for the **speakers/colloquia** is: <http://www.sonoma.edu/scitech/pls/>.

SSU Center for Environmental Inquiry:

The Center's mission is to create an engaged and environmentally ready society, one where everyone has the skills to find solutions to the challenges facing the earth.

With the complex issues before us, such as climate change, overuse of resources, and declining biodiversity, we need to be awake, prepared and engaged. We need to know how to work across sectors and find innovative ways forward.

There is good evidence that we are not ready. Intuitive understanding of ecosystem processes is at an all-time low, and many professionals entering the workforce are not prepared to problem-solve or aware of the impact of ecosystems on economy and culture.

Citizen Science Opportunities

Volunteer Opportunities

Teen Tech San Francisco

Our mission is to inspire and empower the next generation of tech innovators. TeenTechSF is an interactive tech community for teens to innovate, collaborate, and create. Run by and for teens, all our events are free.

Since launching, TeenTechSF has connected 1,600+ teens on five continents with more than 100 tech leaders from Apple to Zynga offering presentations and workshops on design thinking, coding, app creation, robotics, 3-D printing, entrepreneurship, professional networking, tech careers, and global tech trends.

Like the [TeenTechSF Facebook page](#) for the latest news & events.

See the [TeenTechSF@MarchFor Science video](#) and [TeenTechSF March For Science Facebook recap/photos](#).

Water Education Foundation

<https://www.watereducation.org/>

Wildcare

Wildcare is a (primarily) Marin County organization dedicated to the care and protection of wildlife. They have a variety of programs for teachers and volunteers.

Volunteer Opportunities

Check out Wildcare at: www.discoverwildcare.org

Wildlands Conservancy/Jenner Headlands Preserve Events

Relatively few people know about the Jenner Headlands Reserve on the Sonoma Coast. It is a beautiful place, and they provide some great opportunities.

Volunteer Opportunities

http://www.wildlandsconservancy.org/preserve_jenner.html

RESOURCES:

Bay Area Teen Science

this site posts opportunities for teens to get involved in science in a variety of ways. Although many of the postings are now outdated, they can still provide ideas and sites for teens to check back with later.

<http://bayareateenscience.org/>

Bay Model Visitor Center

The San Francisco Bay Model, in Sausalito, is a scale model of the San Francisco Bay. It is used for scientific research and modeling, and is also available for school tours. They also offer a variety of events and programs. Go to:

<http://www.spn.usace.army.mil/Missions/Recreation/BayModelVisitorCenter.aspx>

Brain Pop

Subscription based lessons on a wide variety of topics. <https://www.brainpop.com/>

California Academy of Sciences

The CalAcademy has a variety of programs that would be of interest to youth who are interested in science. They include

- Teen Science Night Digital Learning Tech Teens
- Careers in Science Intern Program
- Teen Advocates for Science Communication (volunteer program)
- Teen Think Tank Science Action Club

Find out more at: <https://www.calacademy.org/youth-programs>

CA Department of Fish and Wildlife Hatchery Education Program

The Hatchery Education Program offered by California Department of Fish and Wildlife's has opened their Fall enrollment period. Apply now for a free one hour session of multimedia learning about fish, watersheds & more! Dynamic activities illustrate key concepts and encourage critical thinking with subject matter aligned with learning standards specific to grade level. The application for Fish Academy, a guided activity based learning day at Don Clausen Fish Hatchery at Warm Springs Dam in early 2017, is also available now. Contact Sastra McGinley at sastra.mcginley@wildlife.ca.gov or (707) 280-3084 or visit www.wildlife.ca.gov/Regions/3/HEP

CA. Department of Parks and Recreation

The California Department of Parks and Recreation has several "Guides for Educators" available that may be of interest to *Grapevine* subscribers. These include resources for teaching about both historic parks and natural parks. Some are available for downloading, including some that I (Mike Roa) wrote. I can provide workshops/staff development on those that I wrote. You might be interested in taking a look at:

The Conifer Connection: A Resource for Learning and Teaching about Coniferous Forests and Watersheds

A Guide to the Side of the Sea: A Teacher's Guide for Field Trips to Rocky Intertidal Areas

Redwood Ed: A Guide to the Coast Redwoods for Teachers and Learners

A Teacher's Guide to Sonoma State Historic Park

Allensworth: A Piece of the World, A Teacher's Guide with Student Lessons and Resources

California State Capitol Museum School Packet (Teacher Version) (Student Version)

Governor's Mansion State Historic Park Teacher's Guide

Indian Grinding Rock State Historic Park and Chaw'se Regional Indian Museum School Tour Information

Tijuana Estuary High School Teacher's Guide

I wrote these three.

Climate Change Educational Materials from the U.S. E.P.A.

Find [climate education teaching tools](http://go.usa.gov/3AVx9) (<http://go.usa.gov/3AVx9>) and introduce your class to a [Student's Guide to Climate Change](http://go.usa.gov/3AV3G). (<http://go.usa.gov/3AV3G>)

Environmental Protection Agency Resources

The U.S. E.P.A. has a variety of resources that you may find useful. Check them out at:
usaepa@service.govdelivery.com

U.S. E.P.A.

Activity Book for Elementary Age Students

How do you describe to students what the EPA does?

Use our newest activity book for elementary age students to help introduce them to EPA. Kids can learn about the different ways the EPA works to protect our environment and our health. It's a simple, straightforward guide suitable for children of all ages.

Download the PDF. (<https://go.usa.gov/xn946>)

Find more downloadable and hardcopy resources at the [National Service Center for Environmental Publications.](https://www.epa.gov/nscep) (<https://www.epa.gov/nscep>)

Evolution Videos

Shape of Life offers FREE classroom videos depicting the evolution of the animal kingdom on planet earth. Students and educators from all over the world explore animal adaptation, animations, and behaviors along with the amazing scientists who bring their stories to life. We also offer a rich selection of NGSS materials including lesson plans, readings, illustrations and activities that inspire a deeper dive into the phyla that explain so much of our existence.

<http://www.shapeoflife.org/>

Geothermal Education Resources

The Geothermal Education Office, in Tiburon, has a wealth of teacher resources on geothermal energy, including slide shows, videos, classroom materials, maps, lists of web sites, and more. go to: <http://geothermaleducation.org/> or contact them at: 24hrcleanpower@gmail.com

Headlands Institute/Naturebridge...Sausalito

A variety of environmental science opportunities for grades K-12 are available at the Headlands Institute. They also have professional development workshops for teachers (formal and non-formal), and a variety of classroom resources. Go to: <http://www.naturebridge.org/golden-gate>

iNaturalist

iNaturalist is a Web site that allows **citizen scientists (like you and your students!)** to post pictures and information about plants, animals, and other science that they see in their yards and travels. It is a GREAT site for your students to not only explore but to contribute to. Go to: www.iNaturalist.org

An example of the use of iNaturalist at the Jenner Wildlands Preserve can be seen at:

http://www.inaturalist.org/projects/jenner-headlands-preserve-inaturalist-notebook?utm_source=Jenner+Headlands+Community+Meeting+2015&utm_campaign=JHP+Analytics&utm_medium=email

and another example can be found at: www.protecthabitat.com

Resources from the Marin Co U.C. Cooperative Extension Service

The Marin County U.C. Cooperative Extension Service has teaching materials on a variety of topics, including sudden oak death, trees/forestry, stewardship, agriculture, and more.. Go to:

http://cemar.ucanr.edu/Programs/Custom_Program816/Environmental_education_resources/

Marin Co. Resource Links:

The County of Marin has compiled a list of environmental education resource links for adults and for kids. Go to: <http://www.marincounty.org/depts/pw/divisions/mcstoppp/archive/resources-for-schools>

Marin Master Gardeners

Dig It. Grow it. Eat it. A workshop

A one-day workshop on edible plants and nutrition for third and fourth graders, led by UC Marin Master Gardeners and held at the Marin Art and Garden Center. Students will learn to identify edible plant parts and about how plants grow, including the science of pollination and propagation.

- **Station 1 - Edible Plant Parts**
- **Station 2 - How Plants Grow**
- **Station 3 - Plant Seed Science**
- **Station 4 - Plant Propagation**
- **Station 5 - Get in the Dirt**
- **Station 6 - Plant Pollination**

If you are interested in this program, please contact UC Marin Master Gardeners Help Desk.
Email: HelpDesk@MarinMG.org, or call: (415) 473 – 4204

Marin – Sonoma Mosquito Abatement District

Free Science Presentations

The Marin/Sonoma Mosquito & Vector Control District offers free presentations about vectors (mosquitoes, yellowjackets and ticks) to any school in Marin and Sonoma Counties. The presentations focus on the biology of vectors and how students can protect themselves from these critters. Visit <http://bitly.com/educationdept> for more information, or contact Eric Engh at erice@msmosquito.com to be added to our scheduling list.

Mystery Science (a.k.a. Mystery Doug)

Lessons based on searching for answers to questions on a variety of topics.
Schools or teachers can try out some of these lessons for free. Fee for unlimited access.

www.mysteryscience.com

Ocean Currents Radio Program

The first Monday of every month Cordell Bank National Marine Sanctuary produces a live radio program on Community Radio for West Marin called Ocean Currents. Hear from ocean experts as you learn about the importance of a healthy ocean.

Broadcast live in the West Marin listening radius and live online at www.kwmr.org, 1-2 pm. The shows are all archived on the Cordell Bank sanctuary [website here](#), or you can subscribe to the podcast.

Looking for a good resource online to get ocean wildlife photos for educational use?

Check out the [National Marine Sanctuaries online media library](#)

Download photos and video footage for free for educational use and check out the marine sanctuaries online encyclopedia. There are 4 National Marine Sanctuaries in CA. Do you know which ones are closest to you?

NOAA Resources for you

The folks at the Cordell Bank National Marine Sanctuary and the National Oceanographic and Atmospheric Administration (NOAA) have a variety of resources and opportunities available. Check the opportunities out at

<http://cordellbank.noaa.gov>

Planet Bee Foundation

[Planet Bee Foundation](#) is a Bay Area nonprofit dedicated to creating a green-minded generation through environmental stewardship, using the lens of the struggling honey bee to teach the power of individual action. We have expanded our offering of hands-on educational programs, each of which can be individually tailored to fit a school's needs, wants, and location. Every lesson is in line with Next Generation Science Standards and grounded in the philosophy of E-STEM learning. We are now taking sign-ups for the 2018-19 school year! Our calendar fills up quickly, so check out our website at planetbee.org and sign up now!

Planet Bee now offers one-day and year-long programs. The [school program overview page](#) on our website lays out each program offering, their alignment with E-STEM and NGSS, and our updated pricing structure. Need-based discounts and sponsorships are available.

All of our programs are developmentally appropriate and designed to address all learning styles. Most programs involve observation of (contained) live bees, games, hands-on activities, and plenty of room for inquiry, creativity, exploration, and discussion. We focus on conservation techniques and environmentalism in every program.

One-day workshops include: [Humble Honey Bee](#), [Bee-ometry](#), [Native Bees of California](#), [Wanna-Bee an Engineer?](#), [Hive Dive Live](#)

Year-long programs include: [ZomBee Watch](#), [Adopt-A-Hive](#), [Wanna-Bee an Engineer?](#), [Honey Bee Series](#), [Native Bee Series](#), [All Bees Series](#)

We have also added a new format for [High School Programs!](#)

Please email our Program Director, Sarah Thorson, at programs@planetbee.org if you have any questions, or sign up for programs via the online registration forms on our website, www.planetbee.org. Together we can change the world - one bee and one student at a time!

Point Blue (Point Reyes Bird Observatory)

At Point Blue, our mission is to advance the conservation of birds, other wildlife, and ecosystems through science, partnerships, and outreach. Our 140 scientists work to reduce the impacts of habitat loss, climate change, and other environmental threats while promoting nature-based solutions for wildlife and people, on land and at sea.

In addition to the scientific work done by the folks at Point Blue, they have a variety of educational programs. Go to:

<http://www.pointblue.org/>

Sonoma County Wildlife Rescue

Presentations

We love to give educational presentations to groups of all ages! We make each presentation to match your group's unique needs. We can talk on a variety of subjects, including ecology, wildlife rehabilitation, and cohabiting peacefully with wildlife. Presentations may include Powerpoint, skits, games, or specimens.

Tours

Each presentation at SCWR includes a tour of our Educational Wildlife Community. Our community is comprised of non-releasable wildlife in natural enclosures. Animals include mountain lions, coyotes, raccoons, and many more!

If you would like to sign up for one of our presentations, please call (707) 992-0274 or email us at education@scwildliferescue.org.

Web site: <http://www.scwildliferescue.org/presentation-at-scwr.html>

For information, contact Linnaea Furling at: education@scwildliferescue.org or 707-992-0274

Sonoma Resource Conservation District:

Education

LandSmart Education® creates connections and inspires conservation through a series of engaging educational opportunities for community members of all ages. Youth programs offer innovative hands on learning experiences at local farms. A distinctive public outings series highlights local protected agricultural properties and the importance of conservation as a tool in working landscapes in partnership with local landowners. Our annual workshops are designed to deliver cutting edge information and resources about land management techniques available through RCD and partner programs with topics including water management and conservation, fish and wildlife habitat enhancement, erosion control, soil health, and carbon sequestration.

Education programming includes:

- FARMS Leadership Program- high school youth
- TEAM Program field trips- elementary school students
- Agricultural Heritage Series- for members of the public
- LandSmart Workshops- designed for landowners and managers

The California Academy of Sciences, the Exploratorium, and other organizations periodically offer free “Teen Science Night” events. Partners include Space and Science Museum, de Young Museum, Oakland Zoo, San Francisco Zoo, Marine Mammal Center, NASA and others. Do (or have your students do) an Internet search for “Teen Science Night” for upcoming events.

Teen Tech San Francisco

Our mission is to inspire and empower the next generation of tech innovators.

TeenTechSF is an interactive tech community for teens to innovate, collaborate, and create.

Run by and for teens, all our events are free.

Since launching, TeenTechSF has connected 1,600+ teens on five continents with more than 100 tech leaders from Apple to Zynga offering presentations and workshops on design thinking, coding, app creation, robotics, 3-D printing, entrepreneurship, professional networking, tech careers, and global tech trends.

Like the [TeenTechSF Facebook page](#) for the latest news & events.

See the [TeenTechSF@MarchFor Science video](#) and [TeenTechSF March For Science Facebook recap/photos](#).

This Week in California History...

is a new site for learning about California history, including California’s science and environmental history.

ThisWeekinCaliforniaHistory.com is a digital playground for California history and geography. It posts what happened in California over 500 years a week at a time; from natural history to LGBT milestones and including science events like 19th century patents by women in California. The site is free, non-commercial and full of interesting content.

U.S. Forest Service:

You may now order FREE sets of scientist cards from our web site! The cards feature Forest Service scientists and are a great way to introduce students to different science careers. To view the variety of cards we have, please visit <http://www.naturalinquirer.org/scientists-v-92.html>. We also have 2 lesson plans to accompany the cards. These lesson plans are available as pdf files on the web page listed above and the direct links are: <http://www.naturalinquirer.org/UserFiles/File/FinalScientistsCardSeriesLessonPlan.pdf> and [http://www.naturalinquirer.org/UserFiles/File/CardLessonPlans_StealingBundles\(1\).pdf](http://www.naturalinquirer.org/UserFiles/File/CardLessonPlans_StealingBundles(1).pdf).

To order your free sets of cards today, please visit <http://www.naturalinquirer.org/Scientist-Card-Ordering-Page-v-155.html>.

Wet Gazette

The Water Education Foundation and California Project WET have changed the format for their Web site for water education resources. This excellent source for water education resources includes:

- Trending: What's Happening Now in California Water
- Water Topics: News, Events, and Information by Topic
- Aquaforia: What News You Need to Know
- Aquapedia: An Online Water Encyclopedia
- A Quicklink section giving upcoming events, and resources for purchase

For the spring issue of the Project WET Gazette, go to:

http://www.watereducation.org/publication/spring-2018-california-project-wet-gazette?utm_campaign=Welcome%20to%20Spring%2C%20California%20Project%20WET%20Alumni%21&utm_medium=email&utm_source=bundle_and_blast

For everyone seeking workshops, we have a variety for you to choose from this summer and a few already posted for the fall at the Foundation's website at [workshops](#) and [Special Workshops and Events](#). We also have lots of non-school related 'Events' for those who just want to get away!

Wildcare/Terwilliger Nature Education Programs

The Wildcare's Terwilliger Nature Education Programs offer a wide range of environmental education opportunities for K-12 classrooms, including:

- Live Wildlife Ambassador Program:** Three wildlife ambassadors will visit your classroom for an unforgettable presentation. Possible wildlife visitors include a Northern Spotted Owl, Virginia Opossum, California Desert Tortoise, Red Tailed Hawk, Gopher Snake and many more!
- Nature Hikes: Guided discovery hikes are offered at four locations (Spring Lake, Miwok Meadows, Ring Mountain, Muir Woods)**
- Nature Van:** Students will explore touchable taxidermy, bones and biofacts in this interactive presentation at your site. Choose from a variety of topics including California Wildlife, Birds of a Feather, Marvelous Mammals, Redwood Giants, Wild Wetlands, Ocean Adventures and Going Green.

-Center Tours: Meet our non-releasable rescued wildlife ambassadors in a guided tour around our outdoor courtyard and museum. Each tour includes a special animal encounter with one of our wildlife ambassadors.

Each classroom automatically qualifies for a scholarship that matches the percentage of the student body enrolled in the Free and Reduced Meal Program.

For more information or for additional teacher resources, visit <http://www.wildcarebayarea.org/education> or email tory@wildcarebayarea.org

WATER WEBSITES OF INTEREST

Visit the USA

Here you will find lots of great information and tips on visiting and traveling in the USA. No two trips are alike, so you will find information in this section for a variety of trip types. Whether you prefer staying in a resort or camping under the stars, the site includes details travelers need to be safe and happy a trip. Being prepared early and knowing what to expect will help reduce traveler stress and be more able to enjoy the unexpected events of travel. This website has done a lot of the ‘Wet Vacation’ research on states for students – and each state description often includes links to state travel sites that highlight regions within the state, such as the California travel website below.

Visit California

If you know which part of California is of interest but you still need some guidance, click on “Map,” and then explore one of the 12 geographical regions of the state. We’ve organized our content—including videos, a printed visitor’s guide and even [travel tips](#)—with an eye toward helping find what you want quickly and easily. Searching this site is simple: If you already know what you’re looking for, type the keywords into our search bar at the top of the page. The “hamburger” menu in the top right corner of the page is another great resource—it has links to articles and other content organized around interests.

National Park Service: [Plan Your Visit](#)

Are you ready? Whether you want to explore local places or plan a vacation, you’ll [find a park](#) to suit your interests! The National Park Service preserves unimpaired the natural and cultural resources and values of the National Park System for the enjoyment, education, and inspiration of this and future generations. This is a wonderful website to pair with or expand on ‘*Discover the Waters of Our National Parks*’ (p: 495) or [the California version of the activity!](#)

U.S.G.S. – [The National Map](#)

As one of the cornerstones of the [U.S. Geological Survey’s National Geospatial Program](#), The National Map is a collaborative effort among the USGS and other Federal, State, and local partners to improve and deliver topographic information for the Nation. It has uses ranging from recreation to scientific analysis to emergency response. The National Map Viewer is the one-stop destination for downloading map data and products. It uses easy to navigate foundational base maps and makes it simple to download products such as the US Topo.

U.S. Climate Data

The purpose of the U.S. Climate Data is to inform people about the climate in the United States. This website was developed by Your Weather Service. The website includes monthly and daily data for temperature, precipitation, snowfall and sunshine for multiple locations in every state. The monthly data also includes a climograph of the average precipitation, maximum and minimum temperature by month for each location that can be opened separately in its own page to copy. Each location also includes Google map link to see where it is located and a link to the current weather forecast at that location. The page also links to [climate.eu](#) where one can find monthly data for countries in Europe and Africa.

NOAA: [U.S. Climate Atlas](#)

These maps use daily observations of temperature and precipitation from over 10,000 stations in the U.S. based on new methodologies to quality control the daily data, summarize the daily data into monthly values and the creation of maps to visualize the information. There are maps for minimum temperature, maximum temperature, and precipitation. There are two types of data that can be displayed; maps for a particular month and year from 1895 to present, or climatology maps. The climatology maps represent average values from 1981 to 2010. These are also known as the “1981-2010 Normals”.

NOAA: [Defining Climate Normals](#)

You’re looking forward to taking a much-deserved vacation in four months, and you want to visit a U.S. city you’ve never been to before. So, how do you decide where to go? Perhaps you’ll consider places where you can expect your ideal temperatures. But, at four months out, your trusted weather forecast probably won’t be much help in finding locations that meet your

temperature criteria. Fortunately, our scientists have calculated the “normal” temperatures you can expect to see each month at locations across the United States. We call them [Climate Normals](#), and we compute a new installment every decade.

ESRI: [Severe Weather Public Information Map](#)

Manage your severe weather response with live feeds and sensor data. This map features live feed layers for Severe Weather across the United States and Canada and displays the predicted ice accumulation for the next 72 hours across the Continental United States. Data are updated hourly from the National Digital Forecast Database produced by the National Weather Service.

NOAA: [Climate Data Primer](#)

Heading out for a walk on a chilly spring morning, you notice misty clouds on the hills in the distance. You’re feeling eager for summer to arrive, but the hillsides are just beginning to green up after the end of winter. You wonder, “Is it cooler than usual this spring? I think I’m usually wearing shorts by this time of year.” Thinking about the weather, you recognize what you’re really concerned about is if it will rain on your barbecue this weekend.

NOAA: [Historical Climate Summaries – New Version](#)

The Regional Climate Centers (RCC) deliver climate services at national, regional and state levels working with NOAA partners. The Regional Climate Center data interface is being updated, but you can already start using the new version. Click ‘OK’ on the note about the page not loading Google Maps correctly, then choose one of the two ways to use the map as described below the map. Click on any data point that appears to get more data than you probably want! This website includes the ‘30-year normals’ used in the U.S. Climate Data locations, the maps in the U.S. Climate Atlas – AND you can get all the raw data available for the life of each gauge on the RCC map!

NOAA: [Comparative Climatic Data](#)

The Comparative Climatic Data tables of meteorological elements outline the climate conditions at major U.S. weather observing stations, Puerto Rico, and the Pacific Islands. The stations list is alphabetically by state. The table arrangement is so a single table of the same element allows the user to compare the values for different locations. Some elements will not be in the table for weather stations that do not regularly report that element. This site also allows users to [view data and graphs of temperature and precipitation Climate Normals](#) for over 9,800 stations across the United States.

US EPA: [Climate Change Indicators: Weather and Climate](#)

Rising global average temperature is associated with widespread changes in weather patterns. Scientific studies indicate that extreme weather events such as heat waves and large storms are likely to become more frequent or more intense with human-induced climate change. This chapter focuses on observed changes in temperature, precipitation, storms, floods, and droughts.

Real World Learning Objects: [Using Excel to Create a Climograph](#)

A climograph is a chart commonly used to graphically display both annual temperature (highs, lows, and averages) and precipitation information for a city or region. Meteorologists and climatologists use climatograms to understand the general climate of a region. They are also frequently included in travel books and tourism brochures so interested visitors can select the “best” time of year to visit a certain location. This website walks one through [how to use a spreadsheet program to create a climograph](#), and then use and analyze the graph to make a recommend times of the year to visit their area of study.

GardenZeus: [California Climate Zones](#)

The same weather and climate factors that may affect vacation plans also come into play when planning what to plant in your garden. GardenZeus California Climate Zones were developed by taking into account many factors including seasonal climate, temperature averages, elevation, frequency of frosts and precipitation. The website includes a wonderful synopsis of the prevailing weather and climate in each of their California climate zones, which upon clicking on shows a list of garden plants recommended for the region.

Desert research Institute: [Stories in the Snow](#)

DRI is pioneering an exciting and unique approach to the science of snow. The Stories in the Snow project engages community members as citizen scientists in real data collection and research throughout the Sierra Nevada. Every snowflake is unique, and the shape of freshly-fallen crystals can tell us about real-time atmospheric conditions. Using smartphone technology, you can help track the path a snowflake has taken through the atmosphere!

[California Project WET Supplemental Materials Page](#)

Remember to check this Water Education Foundation web page to find California specific supplements and other materials for use with Project WET activities, including other activities tied to weather and climate such as the California version of ‘*Discover the Waters of Our National Parks*,’ ‘*Snow and Tell*’ or ‘*Back to the Future*.’
