Grapevine

August, 2023

***If you represent an organization and would like to write your own (short) description, that would be GREAT. If you offer opportunities for volunteering or citizen science, please be sure to note that.**

What is the Grapevine?

The *Grapevine* is a free monthly e-newsletter intended to help inform North Bay Area educators about science and environmental education resources, events, opportunities, etc. To receive the *Grapevine*, just send an email asking to be added to the *Grapevine* email list to: mroa@sonic.net

Please share this information with whomever might be interested, and ***if you find out about something that should be shared among science and environmental educators, please let me know.***

If you would like to have your event or other science or environmental education opportunity included in the Grapevine, send me an email with a short announcement that I can cut and paste. Send to: mroa@sonic.net Submissions are usually due on the 25th of the month. I plan to send the Grapevine the around the first of each month. (See Submission Due Date below.)

To unsubscribe, just send me an e-mail asking to be dropped from the Grapevine list.

Past issues of the Grapevine are being archived at the North Bay Science Discovery website at:

<https://www.northbayscience.org/grapevine>

Submissions Due:

I've decided to change the due date so that I can send out the *Grapevine* closer to the first of each month. Submissions for the next *Grapevine* are due **August 25**. The next issue will include events approximately through **September 16**.

Interested in a JOB? Have an opening to advertise? See the JOBS section on pg. 12, following the articles.

Sharing...resources, information, opportunities

Stewards of the Coast and Redwoods...

Animal Tracks and Signs

WHEN:

Monday, August 14, 2023 (Another class will be offered on September 1) 8:00 am - 12:00 pm

WHERE: Pomo Canyon Environmental Campground

Highway 1 to Willow Creek Road
Duncans Mills, CA 95430

Meets: Pomo Canyon Environmental Campground, Highway 1, Duncans Mills, CA 95430

Fee: \$10members, \$8 non-members

Learn to recognize animal tracks and signs, nests and burrows! We will open our senses to details of animal presence and interactions in the environment. Join us as we venture into the world of our local animal inhabitants of beautiful Pomo Canyon!

Please note that Stewards does not turn anyone away for inability to pay. For more information, please telephone 707-869-9177 or [email us](#).

U.C. Climate Steward Certification

WHEN: Wednesday, August 16, 2023 - Wednesday, November 1, 2023 6:30 pm - 9:00 pm

WHERE: **Wednesday Evening Classes on Zoom; in-person field trips**

Stewards of the Coast and Redwoods is pleased to announce our UC Climate Steward Certification course this year for adults interested in climate science, interpretation, and action. Climate Stewards is an exciting new Initiative from the University of California Cooperative Extension in partnership with the Stewards of the Coast and Redwoods. In this program you will learn more about the science of climate change, how to communicate more effectively about this issue, and how to help your community adapt to climate challenges.

The course will be on Wednesday evenings from 6:30-9:00 pm starting August 16th and ending November 9th. The 10-week course combines online classes with guest experts and three Saturdays learning and visiting climate-relevant sites in Sonoma County; and will complete online coursework and a final capstone project to receive your certification from the University of California. In this interactive course you will practice the skills you need to work with others on finding climate solutions.

As a Certified Climate Steward, you will become part of a statewide network working to promote community and ecosystem resilience for California's future. To learn more about this initiative, visit [UCANR's Climate Stewards](#) page. Registration closes on August 12th.

WHEN: Wednesday, August 16, 2023 – Wednesday, November 1, 2022, 6:30 pm – 9:00 pm

WHERE: Classes on Zoom. In-person field trips to be announced.

LOCATION: Classes on Zoom. In-person field trips. Cost: \$456 for members and \$570 for non-members. See below for our scholarship application.

Course Schedule: There is an extension to the course for capstone preparation and presentation. [Click here for the course syllabus](#). Course handbook can be purchased in our e-store (book arrival date to be announced).

Payment/refund policy:

1/3 due at registration. Registrants may cancel up to two weeks before the first day of instruction for a full refund, minus a \$50 administrative fee. Registrants that can successfully refer another student to replace their spot in the course prior to the first day of class will receive a full refund. Registrants that experience a verifiable medical emergency personally, or in their family, between the two weeks of class before and after instruction has begun may re-enroll in the following year's course at a 50% discounted rate, with priority for early registration. No other cancellations, for any other reason, will result in a refund.

Scholarship: [Click here to apply for a scholarship.](#)

For more information, go to Stewardscr.org/events

From the Climate Center Rapid Response Network:

Would you like your high school students to explore climate solutions that hold some hope for the future? A group of retired educators (HS, CC, and four-year college level), working with the local Climate Center, have created some great materials for high school presentations. We can do 60-120 minute presentations involving an interactive PowerPoint followed by a dynamic small-group exercise about Climate-Safe California local solutions to climate issues. In science classes, we emphasize the carbon cycle, sequestration, powering down, and civic engagement. (We also visit English, humanities, social science, and possibly other classes.) We work to fit with state frameworks and your course goals.

Our own goals:

- support young people to have hope and to act
- increase the skilled involvement of local young people in local, state, national, and global advocacy on climate issues

__ learn from young people their resources and experiences, and share your own

Please let us know if you'd like a visit!

Contact Paula Fogarty admin@speakeasies.biz or Leah Halper lhalper@garlic.com

Discovery Day

The 2024 North Bay Science Discovery Day has been scheduled for Saturday, March 9, 2024. If you're interested in participating either as an exhibitor or visitor, please mark your calendar. Visit the web site at northbayscience.org

Sturgeon's Mill:

If you haven't visited Sturgeon's Mill in Sebastopol during one of their free demonstration runs, I highly recommend that you check it out. The demonstrations and objects on display can provide interesting background for your own understanding of redwood logging. Check it out at:

<https://www.sturgeonsmill.com/>

dates are **Sept. 16/17**, Oct. 14-15. Note that they take lunch from 12:00-1:00.

California Ocean & Coastal Amateur Photography Contest

2023 Contest Opens August 1st

Key Details

- Contest Opens: August 1st
- Submission Deadline: September 25th at 5pm
- Announcement of Winners: End of October

This annual contest is free and open to all amateur photographers. An amateur photographer is defined as someone who earns less than 50 percent of their income from photography.

See www.coastal.ca.gov/photo for previous winners, rules, categories, and prizes!

Photographs in this contest feature the following subjects:

- The scenic coast and the Pacific Ocean off California
- People and the California coast
- California ocean and coastal wildlife

[Read the Contest Rules](#)

From the Sonoma Co. Ag & Open Space District:

Share your thoughts about Carrington Coast Ranch

Help Regional Parks shape the future of [Carrington Coast Ranch Regional Park and Open Space Preserve](#). The property, which is part of the historic homelands of the Coast Miwok and sits just north of Salmon Creek, was purchased by Ag + Open Space in 2003. In 2021 Ag + Open Space transferred the property to Regional Parks. Primarily open grassland, which affords spectacular views of the ocean and helps sequester carbon, it's also home to several special status species, like the Townsend big-eared bat, California red-legged frog, and American badger. Regional Parks is creating a master plan to guide the long-term development of this parkland (which is not yet open to the public) and they want to hear from you! Would you prefer all multi-use trails or some trails for hikers only? Picnic sites? Backcountry camping? Share your feedback by taking a brief survey!

[Take survey](#)

Sonoma State Historic Park

August 2023 Events

“Special” Summer Activities at: Mission San Francisco Solano, The Sonoma Barracks, and General Vallejo’s Home.

- Sun Printing, Art, and Nature activity! August 11th. Vallejo Home. 11am-4pm.

Nature and Community Fair ~ Saturday, August 12th, 4-7:30pm

Live owls, bats, and music! California State Parks is hosting a Nature and Community Fair event. Explore over twenty exhibits and tables in the Casa Grande area that will feature local and national nature organizations, live birds, local authors, and nonprofit organizations from around Sonoma Valley and beyond! All ages welcome. Free of charge. The event will take place at 20 East Spain Street, Sonoma.

Twilight Nature Hike ~ Friday, August 25th, 7:00 pm -8:30pm.

Join us for monthly dusk hike with an evening adventure on the lower Montini Preserve Trail. Experience history, nature, and community lead by a Park Interpretive Specialist. This slow-paced hike is a little over one mile in length with minor elevation changes. Sturdy shoes and water recommended). Kids can bring a flashlight! Meet at the Vallejo Home parking lot at the end of 3rd Street West. All ages welcome. Free of charge

LiMPETS at Greater Farallones Association Attention Teachers 2023-24 Program Registration is Now Open!

LiMPETS (Long Term Monitoring and Experiential Training for Students) is a community science program which provides immersive, science-based environmental education that empowers students to become informed and engaged ocean stewards. Field trips include protocol training and a data collection field trip to the coast! To learn more and sign your class up go to <https://farallones.org/limpets/programs/>

LiMPETS Teacher Workshop for Sandy Beach Monitoring is being offered Sunday, August 27 and Sunday, September 9th in San Francisco. Teachers who are interested in participating in LiMPETS Programming are encouraged to attend one training workshop. For more information and to register go to <https://farallones.org/teacher-workshop-registration/>

If you have any questions please email limpets@farallones.org

EPA Invites Youth to Serve on Agency's First-Ever National Environmental Youth Advisory Council

WASHINGTON – The U.S. Environmental Protection Agency (EPA) announced the formal establishment of the agency's first-ever National Environmental Youth Advisory Council (NEYAC). The NEYAC will provide independent advice and recommendations to Administrator Michael S. Regan on how to increase EPA's efforts to address a range of environmental issues as they relate to youth communities. The NEYAC will provide a critical perspective on how the impacts of climate change and other environmental harms affect youth communities. The Administrator announced his intent to launch the youth council last June at the Austrian World Summit.

EPA is soliciting applications for youth to fill 16 vacancies on the NEYAC. Selected applicants will contribute to a balance of perspectives, backgrounds, and experience of the council and will be appointed by the Administrator. As a first-of-its-kind committee, all members of NEYAC will be between the ages of 16 and 29.

As part of the agency's commitment to centering environmental justice communities, at least 50% of the overall membership of NEYAC will come from, reside primarily in, and/or do most of their work in disadvantaged communities as defined by the Climate and Economic Justice Screening Tool (CEJST) as part of Justice40. "We can't tackle the environmental challenges of our time without input from our younger communities, who've long been at the forefront of social movements," **said EPA Administrator Michael S. Regan.** "This committee will help ensure that the voices and perspectives of our youth are included and valued in EPA's decision-making as we continue to advance President Biden's commitment to ensuring everyone in this country has access to clean air, safe water and healthy land, now and for generations to come."

Applications to the NEYAC are due by August 22, 2023 at 11:59PM ET. To apply for appointment to the council, the below information is required:

- Contact information
- Resume **OR** short biography **OR** qualification essay
- Statement of interest
- Media Project

Visit the [EPA NEYAC webpage](#) for more information on the council and to apply.

EPA will be hosting virtual application webinars where the public can ask EPA staff questions live. The webinars will be on Zoom and will be hosted at the following times:

- **Monday, August 7, 2023 @ 12PM – 1PM ET // [Register here](#)**

Children's Museum of Sonoma County

The Children's Museum is making a commitment to elevate our nature education programming. This will mean being more intentional with our message with education around understanding the earth's systems and encouraging responsible stewardship for all of them!

We are looking to enhance our nature education for families* starting this Fall and are reaching out to invite other SEEC** organizations to come present at the Museum or assist us in creating specific programming. What would that look like? We're not entirely sure but we wanted to get the conversation started with the like-minded educators in SEEC. It is also very important to us that we also provide bilingual programming, so we are looking for opportunities for that.

*CMOSC typically provides experiences for children around 10 years old or younger.

**SEEC is the Sonoma Environmental Education Collaborative. It is a group of organizations that provide environmental education. You can check it out at: <https://sonomacountyee.org/>

We look forward to these discussions as we demonstrate the power and importance of environmental education to the entire family!

Contact Theresa Giacomino at theresa@cmosc.org

From the June Forestry Challenge Teacher Newsletter:

Place-Based Scientific Inquiry A Practical Handbook for Teaching Outside

Learn how to facilitate scientific inquiry projects by getting out of the classroom and connecting to the natural environment. Providing a contemporary perspective on how to do scientific inquiry in ways that can make teachers' lives easier and students' experiences better, this book draws on authentic inquiry, engaging with communities, and teaching through project-based learning, to help students design and carry out scientific inquiry projects. This accessible guide will help you to develop skills around facilitation, team building, and learning outdoors in schoolyards and parks, acting as a go-to toolkit for teachers to help build confidence and skills in these areas.

[READ THE BOOK FREELY ONLINE OR DOWNLOAD PDF](#)

Community Resources for Science:

After a much deserved break, it will be time to plan the Fall semester. See some of these resources to help you find what you need.

[Grade Level Programs & Websites](#) - quickly find the resources you are looking for. We'll be updating as partner organizations determine their 2023-24 offerings so check back often!

[Science Education Grants](#) - Find grants to fund your projects for next year.

[Professional Development Calendar](#) - Find professional development workshops to meet your own professional goals.

[Science Teaching Tools](#) - Find a range of resources from science notebooking to science literature to engineering resources to family science night, and so much more.

GREEN SCHOOLYARDS AMERICA

We have exciting news to share! We've just launched our [Schoolyard Forest SystemSM Resource Library](#), a collection of free resources for school districts and nonprofits seeking to build schoolyard forests.

These resources can be found on our website in our online [Schoolyard Forest SystemSM Resource Library](#) landing page. The Library includes guides on how to engage students in the design, building, and upkeep of schoolyard forests, schoolyard forest lesson plans, stewardship tips, our climate-adapted California tree palette and more!

We encourage school districts and non-profits pursuing [CAL FIRE's Green Schoolyards Grant program](#) to use these free resources to plan your greening projects.

BODEGA MARINE LABORATORY

invites you to join us for public tours on Friday afternoons!

IMPORTANT:

Due to limited capacity, you must reserve a date and time to take part in a tour. Additional dates will be added soon. To reserve your spot visit:

<https://www.eventbrite.com/e/public-tours-of-bodega-marine-laboratory-registration-622690533147>

About the Event:

When: Fridays, starting at 2pm

Where: 2099 Westshore Rd. Bodega Bay, CA 94923

What will I see?

These tours are led by our wonderful crew of ocean-loving docents, and visitors will learn about ongoing marine and coastal science research at Bodega Marine Laboratory and its history on the Sonoma Coast. Plus, you'll get to meet a variety of colorful and diverse ocean creatures.

Who's invited?

Although we welcome all ages, these tours are best for people who are school-aged and above. Dogs and other pets are not allowed, with the exception of service animals.

Public tours are only available by reservation. If your preferred tour time is already full, you can place your name on a waitlist through Eventbrite to claim a spot if one becomes available.

If you are interested in arranging a tour for a school or other group of 10 or more people, please contact alcarranza@ucdavis.edu instead of booking through the public tour reservation system.

What else should I know?

As you drive up to the lab, please be mindful that we are on the Bodega Marine Reserve, a protected home for many marine and terrestrial creatures. We ask that you reduce your speed to the posted limits and watch out for wildlife.

While on the tour, please stay with your group and do not explore on your own, as parts of the laboratory and reserve contain sensitive organisms and research data that are easily damaged.

Does the tour cost money?

We provide our public tours free of charge, but donations are encouraged and appreciated. Donations are critical to supporting the care and maintenance of the aquaria and animals you will see during your tour.

If you would like to make a gift, you can do so by selecting the donation option when you reserve your tour spot or visit our website to learn about more ways to give: marinescience.ucdavis.edu/give

High Schools: Announcing the Fall,2023 Forestry Challenge

Santa Cruz - October 11 to 14 - Redwood Glen near Loma Mar

Shasta - September 27 to 30 - Mountain Meadows Camp east of Redding

El Dorado - October 25 to 28 - Leoni Meadows Camp south of Placerville

San Bernardino - November 8 to 11 and 15 to 18 – Hume SoCal near Lake Arrowhead

This Event is FREE!

Watch a one-minute [introductory video!](#)

The Forestry Challenge is an academic event for high school students in technical forestry and current forestry topics. Participants spend four days in the forest learning about the ecology and management of the forested landscapes that provide communities with water, recreational opportunities, wood products, and wildlife habitat. For more about the program, visit the [Home](#) page of the Forestry Challenge website. School groups (typically 4 to 10 students and a teacher chaperone) are welcome to attend any event that is the best fit for location, school schedule, and interest.

Some interesting reading:

In the August issue of **National Geographic** :

- An article with beautiful photos of microscopic aquatic critters
- An article titled “How a Discovery is (Dis)proved
- “The Golden Age of Mummification”
- “Unlikely Refugees” about animals rescued from war zones, failing zoos, and elsewhere

The summer issue of **Sierra**, the magazine of the Sierra Club, includes:

- Future Forests of America (about efforts to reforest after wildfires)
- Beasts of Burden (problems caused by wild horses)
- Some efforts to revive monarch populations
- Planes, Trains, and Decarbonization – Is a future without air travel possible?
- And many other articles

TED Talks: Science Worth Knowing:

New science-related talks are frequently posted.

check it out at <https://www.ted.com/topics/science>

Science in the News from Sigma Xi

(Sigma Xi is a science honor society. You can sign up to receive their **bi-weekly** science e-newsletter at: <https://www.sigmaxi.org/news/newsletters>

Some stories from recent newsletters include:

- Drought could end eruptions of Yellowstone's geysers
- AI helps scientists map movements of endangered dolphins
- MIT scientists create 3D-printed patch that can take breast ultrasound images
- Once frozen in time, worms come to life after 46,000 years
- Polyethylene plastic succumbs to wood's lignin
- Effects of screen time on preschoolers
- Reduced cancer risk tied to short bursts of physical activity

Sci Tech Daily

Sci Tech Daily is a (you guessed it...) **daily** brief summary of current events in a variety of science fields, including general science, health, space, technology and others.

Go to <https://scitechdaily.com/> **Among many others, the July 31 edition included:**

- Shark shock: Scientists discover basking sharks are warm-bodied in one-in-a-thousand exception
- UCLA finds AI language model...can reason about as well as a college student
- Earth's plate tectonics recently underwent a fundamental change
- Innovative new vaccine may hold key to treating and preventing Alzheimer's disease
- Protein found in cow's milk significantly speeds up wound healing

Science Humor:

See Hot (Cool?) Links below

Hot (Cool?) Links:

Have you heard of Reina del Cid? She is a folk singer/song writer based in Los Angeles and Minnesota. She writes some of her own music and does covers of songs by other artists. She also does a lot of YouTube videos, including a few science-based ones. Check out these YouTube videos:

Live and Learn

(in which Mike shares something that he's recently learned.)

A recent *New York Times* article was titled "You Really Are a Tick Magnet."

Sam England, a biologist at the Natural History Museum in Berlin and Katie Lihou, a veterinary Parasitologist, published an article in the journal *Current Biology*. They found that static electric fields naturally produced by animals, including people, can physically attract ticks from their waiting purchases on plants onto animal hosts.

I've always thought that ticks were waiting on blades of grass and other plants for an animal to pass by close enough for them to latch on to the host as the host brushes against the plant. But this research indicates that ticks may be attracted to hosts by static electricity without the hosts actually coming into contact with the ticks. Ticks were pulled several millimeters in the experiments.

Jobs: Stewards of the Coast and Redwoods:

Park Steward.

Essential Functions: Stewards is seeking qualified candidates to assist our organization in the daily park operational tasks and customer service. Job duties will include staffing the entrance kiosk at Armstrong Redwoods, collecting day use fees, counting, and reconciling monies collected, answering phone calls and visitor's questions, registering campers, and interacting tactfully with our visitors. Loading and driving Stewards vehicles and doing so in a responsible manner. Job duties also include campground and facility maintenance, cleaning, and road/trail clearing

Job description and application process: https://stewardscr.org/wp-content/uploads/2023/06/2023_Park_Stewards_Job_description-and-announcement.pdf

We at **Point Blue Conservation Science's STRAW Program** are hiring and would so appreciate your support with spreading the word!

The position we are hiring for is a Bilingual Conservation Educator. The application period ends August 9th. Thank you for sharing widely within your networks. Please see the link below for the full job description.

<https://www.pointblue.org/careers/bilingual-conservation-educator/>

Please reach out with any questions whatsoever!

Canopy an urban forest nonprofit based in Palo Alto is hiring an [Education Director](#). Learn more by visiting: <https://canopy.org/about-us/jobs/JOB DESCRIPTION HERE...>

Headwaters Science Institute is hiring Part-Time field science teachers.

Headwaters Science Institute is seeking science mentors with prior field science research experience who are passionate about outdoor science education to assist with field days associated with school programs in the Bay Area. Headwaters Science Institute is a science education nonprofit based in Soda Springs, CA that works with students to bring them through the entirety of the scientific process. We aim to use local scientists to give students a glimpse into relevant science research that is happening in their communities. As a science mentor, you will assist students with data collection for the research question they will have designed. Methods for data collection will vary based on student questions but will most likely include things like quadrat and transect sampling, soil chemistry testing, water quality measurements, and other simple techniques students will be able to practice in their short time in the field. The pay rate for these field days is \$175/day. We work in the Bay Area, Sacramento, Truckee/Tahoe, and Reno.

If you are interested in work, please contact our Program Manager Bryn at bryn@headwatersscienceinstitute.org for more information.

[See all listing here](#)

Abraham Lincoln High School (San Francisco)

Our Chemistry program at Abraham Lincoln High School (ALHS) is growing and we are hiring another 1.0 FTE **Chemistry Teacher**. This person will be responsible for teaching 5 sections of NGSS Chemistry. Please see the [job description](#) (#16923) and [application process](#). Curriculum information: [SFUSD NGSS Chemistry Curriculum](#)

We're also hiring for a **Biology** position. Please see the [job description](#) (#17412) and [application process](#). SFUSD Scope and Sequence: [Biology](#)

Additional information:

- [Where is ALHS?](#)

Science and Environmental Education Organizations

These organizations offer science or environmental education opportunities and/or **volunteer** or **citizen/community science** opportunities.

If I know of **volunteer** or **citizen/community science opportunities**, I've indicated that, but some may have opportunities about which I don't know.

Check their web sites for more information.

American Cetacean Society

Description: As the name implies, the ACS works to protect cetaceans (whales, dolphins, porpoises), and also supports research.

Web site: The San Francisco Bay chapter's website is: <https://www.acs-sfbay.org/>

Aquarium of the Bay:

Aquarium of the Bay has returned to onsite programming for the 2022-2023 school year. K-12 schools can book either Aquarium-Teacher lead classroom programs (fee-based) or Self-Guided Tours (free).

Available Programs:

Kinder – Between the Tides: Learn about the animals that live in the tidepool and the adaptations they have in order to survive their ever-changing world.

1-3rd – Salmon!: Follow the salmon lifecycle from egg to the end and discover how human impacts affect its life journey.

3-5th -Sensational Sea Lions: Come learn about and observe the World-Famous Pier 39 sea lions. How did they get here, why they stay here, and above all, what makes them such amazing animals

6-8th – Kraken Lab: Come and participate in a squid dissection and learn the ins and outs of this unique animal

9-12th – 3D Printing Lab: This brief introduction to 3D printing will enable your students to learn not only some of the history behind it, but also help print plates that will be used to aid the non-visual community.

K-12th – VIP School Group Tour: This special tour of the building is held before the Aquarium opens and enables students to see the work that is often not seen by the public. This tour is limited to 25 participants and is not bookable on the website. Please email us for more information

K-12th – Self-Guided Tour: While this tour is booked on 20-minute intervals, the tour length is 1 hour. Your class will be able to go as fast or as slow as you would like which makes it perfect if you only have a limited amount of time.

Email education@bay.org for more information on any of these programs

Visit <https://www.aquariumofthebay.org/> and under the Education tab, you will be able to locate things like K-12 programs, teacher resources, eLearning modules, Plastic Free Campus, and Professional Learning Courses.

CA. Native Plant Society

The Milo Baker Chapter of the California Native Plant Society (CNPS), named after the famous Santa Rosa Botanist, is located in Northern California's beautiful Sonoma County. CNPS is a statewide organization whose goals are to increase understanding and appreciation of California's native plants, and to preserve them and their natural habitats for future generations. Membership is open to all.

California Naturalist Program

The UC California Naturalist Program is designed to introduce Californians to the wonders of our unique ecology and engage the public in study and stewardship of California's natural communities. The California Naturalist program uses a science curriculum, hands-on learning, problem-solving, [citizen science](#), and community service to instill a deep appreciation for the natural communities of the state and to inspire individuals to become stewards of their local resources.

The mission of the California Naturalist Program is to foster a diverse community of naturalists and promote stewardship of California's natural resources through education and service.

The California Naturalist Program promotes environmental literacy and [stewardship](#) through [discovery](#) and [action](#). Many other states have similar naturalist programs, but this is the first statewide program in California. To [become a certified California Naturalist](#), participants need to enroll in a 40+ hour course with one of [our partner organizations](#).

We work with over 45 partner organizations that deliver the course and have certified a community of over 2800 Naturalists around the state who have, in turn, volunteered over 175,000 hours in service to nature in the areas of education and interpretation, stewardship, citizen science, and environmental program support. Courses combine classroom and field experience in science, problem-solving, communication training and community service. Students are taught by an instructor and team of experts who are affiliated with a local nature-based center or natural resource focused agency. Upon completing certification requirements, participants are eligible for four academic credits through [UC Davis Extension](#) for an additional nominal fee.

Some CalNat programs are offering online or hybrid programs. See below.

Children's Museum of Sonoma County

<http://www.cmosc.org/>

Mission

The Children's Museum of Sonoma County inspires curiosity and creativity through joyful, transformative experiences.

About Us

The Children's Museum of Sonoma County (CMOSC) was founded in 2005. Rooted in current early childhood research, CMOSC engages children in joyful discovery experiences that develop foundational skills, create lasting memories, and spark a lifelong love of learning.

Designed for children and their caregivers, the Children's Museum's experiential exhibits emphasize hands-on engagement and learning through play with a focus on art, nature, and science.

The Children's Museum proudly supports the work of parents, caregivers, and educators in raising happy, healthy, and strong children. Since opening its doors in 2014, it has become a valuable cultural resource and destination for Sonoma County.

Community Resources for Science

CRS helps teachers build on that enthusiasm and bring meaningful science learning experiences to life in their classrooms. Children have a natural curiosity and a craving to learn. CRS works to nurture that learning by connecting classroom teachers with scientists, museums, enrichment providers, and professional development programs in order to bring more science learning experiences to students. CRS also helps individuals and organizations involved in science education to work together and become stronger partners for teachers and schools.

We have compiled some resources for teachers that we thought might be useful as we face school closures and move to more online learning opportunities while we practice "social distancing" in the wake of the spread of COVID-19.

<https://www.crsce.org/>

Community Soil Foundation

Student-Grown Farm Stand

Community Soil Foundation's mission is to cultivate the wellness of Sonoma County communities by offering land-based education, creating access to organic produce, and regenerating habitat and natural resources. We invite you to come to the Larkfield Community Garden & Learning Center every Wednesday afternoon for your weekly supply of nutritious, organic produce. All fruits, veggies, and flowers are grown by Mark West students and community volunteers using biodynamic and sustainable methods, with proceeds helping fund the garden. All sales are by donation. Look for our Farm Stand at 450 Noonan Ranch Lane and check out other happenings at www.communitysoil.org.

Volunteer Opportunities

CREEC

The California Regional Environmental Education Community (CREEC) Network is a program of the California Department of Education. The CREEC Network fosters regional partnerships throughout the state of California to promote environmental education and environmental literacy by providing teachers with access to high quality professional learning opportunities and education resources.

Along with statewide sponsors and partners, each of the 11 California CREEC Regions provides professional learning opportunities and resources to educators as well as foster communications among

schools and organizations interested in supporting the environmental literacy of California’s teachers and students. More information on the CDE’s CREEC Network program is posted on the [CDE website](#).

Different areas of the state have different CREEC Regions. For information about events in your region, go to: www.creec.org, and select “regions” at the top

Daily Acts

Who We Are

We are a holistic education nonprofit that takes a heart-centered approach to inspiring transformative actions that create connected, equitable, and climate resilient communities. We believe in the power of our daily actions to reconnect people to self, community, and place, which helps to heal our society and planet.

Our Mission is to inspire transformative action that creates connected, equitable climate resilient communities.

Our Vision is to create healthy, just and sustainable communities built upon the daily actions of many people.

East Bay Regional Park District

The East Bay Regional Park District is a system of beautiful parklands and trails in Alameda and Contra Costa counties to the east of San Francisco. The system comprises nearly 125,000 acres in 73 parks, including over 1,250 miles of trails and 55 miles of shoreline. We acquire, manage, and preserve natural and cultural resources for all to enjoy now and into the future. Our parks are ideal for healthful recreation and environmental education. We invite you to enjoy hiking, biking, picnicking, horseback riding, camping, fishing, boating, golfing, and nature study in our parks. [General Brochure](#) [PDF]

<https://www.ebparks.org/>

Education and the Environment Initiative

Who We Are

The California Education and the Environment Initiative is a program of CalRecycle's Office of Education and the Environment (OEE). Our mission is to foster environmental literacy among all California students as part of a high-quality K-12 education. Environmental literacy builds critical thinking and analytic skills that prepare students to make informed decisions about issues affecting our world, and readies them for college and career success.

Our key environmental literacy implementation partners include the California Department of Education's [California Regional Environmental Education Community Network](#) and [Ten Strands](#), a nonprofit organization that supports environment-based learning

Forestry Challenge

The Forestry Challenge is an academic event for high school students in technical forestry and current forestry topics. Since its inception in 2003, the program has grown from one event to five, a complete buildout of the program in California.

Participants spend four days in the forest learning about the ecology and management of the forested landscapes that provide communities with water, recreational opportunities, wood products, and wildlife habitat. Youth benefit by better understanding the relationship of the forested environment to their community, by exposure to natural resource management as a potential career option, and by undertaking a rigorous critical thinking exercise which is timely and addresses current forestry topics such as wildfire, insects, and forest health.

Watch a one-minute [introductory video](#)!

Friends of the Petaluma River

WHO WE ARE

In 2005 Friends of the Petaluma River was formed to connect our community with the wonders of the Petaluma Watershed. While much of our work is focused on conservation and education surrounding this sensitive habitat, we also believe that celebration plays a large role in our mission. Through events at the River Heritage Center, family programming around the Watershed and access opportunities for the public we bring our Watershed to life.

Our Mission

Our mission is to celebrate the Petaluma Watershed through education and stewardship; because every great River needs a true Friend.

Our Goals: Access, Education, and Conservation

- To pursue outreach and educational activities that will nurture enthusiasm and commitment in the watershed for long term sustainable stewardship.
- To monitor conditions and engage in activities that will reduce or prevent pollution and lessen other harmful impacts on the River and its wetlands.
- To foster a River Heritage Center as a community resource. A place to archive information, host events, administer programs, and coordinate river related activities.
- To promote access to the Petaluma River and Marsh for all community members to experience the beauty of this resource for themselves

*Are you incorporating environmental education into your classroom?
Or would you like help developing and implementing a project about the Petaluma Watershed?
Let the Watershed Classroom support you!*

Green Schoolyards America

Green Schoolyards America seeks to transform asphalt-covered school grounds into park-like green spaces that improve children's well-being, learning, and play while contributing to the ecological health and resilience of our cities. We are working to change the norm for school ground design, use, and management so that all children will have access to the natural world in the places they already visit on a daily basis.

Our programs support the living school ground movement, build relationships that help it succeed, and work to embed this perspective in our existing institutions and policy and regulatory frameworks.

<http://www.greenschoolyards.org/>

Headwaters Science Institute

The Headwaters Science Institute provides science and environmental education through student-driven research. It is headquartered in Soda Springs. They offer some high school programs for which they charge, butr also provide some free online learning opportunities.

Sonoma Ecology Center and Sugarloaf Ridge State Park’s Team Sugarloaf

Sonoma Ecology Center works to address challenges related to water supply and quality, open space, rural character, biodiversity, energy, climate change, and a better quality of life for all residents. Since 1990, we’ve worked to increase appreciation and stewardship of Sonoma Valley’s natural heritage and create measurable benefits in areas of land, water, climate change and biodiversity.

Vision

We envision a future where people, land, water, and wildlife thrive.

Mission

Our mission is to work with our community to identify and lead actions that achieve and sustain ecological health in Sonoma Valley.

Robert Ferguson Observatory:

Robert Ferguson Observatory is continually looking for new docents and volunteers of all ages to help bring the universe to the public. The Observatory is run by the Valley of the Moon Observatory Association, a 501(3)(c) non-profit, and has offered outreach-based astronomy and science programs to the public for almost 25 years. RFO is almost all-volunteer run and typically serves about 9,000 visitors annually. The observatory is located in Sugarloaf Ridge State Park and houses a 40-inch reflector telescope, the largest telescope in Northern California that is accessible to the public; a robotic 20-inch research-grade, "CCD" telescope; and an 8", two-meter long refractor telescope. Prior experience or knowledge in astronomy is not necessary. Please go to rfo.org, click on "Volunteer" and fill out the volunteer application form online to get on the list for our next docent orientation and training! Questions? Contact Stephanie Derammelaere at 707-333-1331 or at sd@rfo.org.

Citizen Science Opportunities

Sonoma/Petaluma State Historic Parks

While the Sonoma/Petaluma area state Parks primarily focus on history, they do have some science/environmental events and offerings such as twilight nature hikes.

For info, go to www.sonomaparks.org

Sonoma State University:

The Sonoma State University School of Science and Technology has a periodic online newsletter that gives news about the school and includes a link to the various department public speakers and events.

The link for the **speakers/colloquia** is: <http://www.sonoma.edu/scitech/pls/>.

SSU Center for Environmental Inquiry:

The Center's mission is to create an engaged and environmentally ready society, one where everyone has the skills to find solutions to the challenges facing the earth.

With the complex issues before us, such as climate change, overuse of resources, and declining biodiversity, we need to be awake, prepared and engaged. We need to know how to work across sectors and find innovative ways forward.

There is good evidence that we are not ready. Intuitive understanding of ecosystem processes is at an all-time low, and many professionals entering the workforce are not prepared to problem-solve or aware of the impact of ecosystems on economy and culture.

Brain Pop

Subscription based lessons on a wide variety of topics. <https://www.brainpop.com/>

California Academy of Sciences

The CalAcademy has a variety of programs that would be of interest to youth who are interested in science. They include

- Teen Science Night Digital Learning Tech Teens
- Careers in Science Intern Program
- Teen Advocates for Science Communication (volunteer program)
- Teen Think Tank Science Action Club

Find out more at: <https://www.calacademy.org/youth-programs>

CA Department of Fish and Wildlife Hatchery Education Program

The Hatchery Education Program offered by California Department of Fish and Wildlife's has opened their Fall enrollment period. Apply now for a free one hour session of multimedia learning about fish, watersheds & more! Dynamic activities illustrate key concepts and encourage critical thinking with subject matter aligned with learning standards specific to grade level. The application for Fish Academy, a guided activity based learning day at Don Clausen Fish Hatchery at Warm Springs Dam in early 2017, is also available now. Contact Sastra McGinley at sastra.mcginley@wildlife.ca.gov or (707) 280-3084 or visit www.wildlife.ca.gov/Regions/3/HEP

CA. Department of Parks and Recreation

The California Department of Parks and Recreation has several “Guides for Educators” available that may be of interest to *Grapevine* subscribers. These include resources for teaching about both historic parks and natural parks. Some are available for downloading, including some that I (Mike Roa) wrote. I can provide workshops/staff development on those that I wrote. You might be interested in taking a look at:

[The Conifer Connection: A Resource for Learning and Teaching about Coniferous Forests and Watersheds](#)

[A Guide to the Side of the Sea: A Teacher's Guide for Field Trips to Rocky Intertidal Areas](#)

[Redwood Ed: A Guide to the Coast Redwoods for Teachers and Learners](#)

[A Teacher's Guide to Sonoma State Historic Park](#)

} I wrote these three.

[Allensworth: A Piece of the World, A Teacher's Guide with Student Lessons and Resources](#)

[California State Capitol Museum School Packet \(Teacher Version\)](#) [\(Student Version\)](#)

[Governor's Mansion State Historic Park Teacher's Guide](#)

[Indian Grinding Rock State Historic Park and Chaw'se Regional Indian Museum School Tour Information](#)

[Tijuana Estuary High School Teacher's Guide](#)

Climate Change Educational Materials from the U.S. E.P.A.

Find [climate education teaching tools](http://go.usa.gov/3AVx9) (<http://go.usa.gov/3AVx9>) and introduce your class to a [A Student's Guide to Climate Change](http://go.usa.gov/3AV3G). (<http://go.usa.gov/3AV3G>)

Environmental Protection Agency Resources

The U.S. E.P.A. has a variety of resources that you may find useful. Check them out at:
usaepa@service.govdelivery.com

U.S. E.P.A.

Activity Book for Elementary Age Students

How do you describe to students what the EPA does?

Use our newest activity book for elementary age students to help introduce them to EPA. Kids can learn about the different ways the EPA works to protect our environment and our health. It's a simple, straightforward guide suitable for children of all ages.

[Download the PDF.](https://go.usa.gov/xn946) (<https://go.usa.gov/xn946>)

Find more downloadable and hardcopy resources at the [National Service Center for Environmental Publications.](https://www.epa.gov/nscep) (<https://www.epa.gov/nscep>)

Evolution Videos

Shape of Life offers FREE classroom videos depicting the evolution of the animal kingdom on planet earth. Students and educators from all over the world explore animal adaptation, animations, and behaviors along with the amazing scientists who bring their stories to life. We also offer a rich selection of NGSS materials including lesson plans, readings, illustrations and activities that inspire a deeper dive into the phyla that explain so much of our existence.

<http://www.shapeoflife.org/>

Geothermal Education Resources

The Geothermal Education Office, in Tiburon, has a wealth of teacher resources on geothermal energy, including slide shows, videos, classroom materials, maps, lists of web sites, and more. go to: <http://geothermaleducation.org/> or contact them at: 24hrcleanpower@gmail.com

Headlands Institute/Naturebridge...Sausalito

A variety of environmental science opportunities for grades K-12 are available at the Headlands Institute. They also have professional development workshops for teachers (formal and non-formal), and a variety of classroom resources. Go to: <http://www.naturebridge.org/golden-gate>

iNaturalist

iNaturalist is a Web site that allows **citizen scientists (like you and your students!)** to post pictures and information about plants, animals, and other science that they see in their yards and travels. It is a GREAT site for your students to not only explore but to contribute to. Go to: www.iNaturalist.org

An example of the use of iNaturalist at the Jenner Wildlands Preserve can be seen at:

http://www.inaturalist.org/projects/jenner-headlands-preserve-inaturalist-notebook?utm_source=Jenner+Headlands+Community+Meeting+2015&utm_campaign=JHP+Analytics&utm_medium=email

and another example can be found at: www.protecthabitat.com

Resources from the Marin Co U.C. Cooperative Extension Service

The Marin County U.C. Cooperative Extension Service has teaching materials on a variety of topics, including sudden oak death, trees/forestry, stewardship, agriculture, and more.. Go to:

http://cemarlin.ucanr.edu/Programs/Custom_Program816/Environmental_education_resources/

Marin Co. Resource Links:

The County of Marin has compiled a list of environmental education resource links for adults and for kids. Go to: <http://www.marincounty.org/depts/pw/divisions/mcstoppp/archive/resources-for-schools>

Marin Master Gardeners Dig It. Grow it. Eat it. A workshop

A one-day workshop on edible plants and nutrition for third and fourth graders, led by UC Marin Master Gardeners and held at the Marin Art and Garden Center. Students will learn to identify edible plant parts and about how plants grow, including the science of pollination and propagation.

- **Station 1 - Edible Plant Parts**

- **Station 2 - How Plants Grow**

- Station 3 - Plant Seed Science
- Station 4 - Plant Propagation
- Station 5 - Get in the Dirt
- Station 6 - Plant Pollination

If you are interested in this program, please contact UC Marin Master Gardeners Help Desk.
Email: HelpDesk@MarinMG.org, or call: (415) 473 – 4204

Marin – Sonoma Mosquito Abatement District

Free Science Presentations

The Marin/Sonoma Mosquito & Vector Control District offers free presentations about vectors (mosquitoes, yellowjackets and ticks) to any school in Marin and Sonoma Counties. The presentations focus on the biology of vectors and how students can protect themselves from these critters. Visit <http://bitly.com/educationdept> for more information, or contact Eric Engh at erice@msmosquito.com to be added to our scheduling list.

Mystery Science (a.k.a. Mystery Doug)

Lessons based on searching for answers to questions on a variety of topics. Schools or teachers can try out some of these lessons for free. Fee for unlimited access.

www.mysteryscience.com

Ocean Currents Radio Program

The first Monday of every month Cordell Bank National Marine Sanctuary produces a live radio program on Community Radio for West Marin called Ocean Currents. Hear from ocean experts as you learn about the importance of a healthy ocean.

Broadcast live in the West Marin listening radius and live online at www.kwmr.org, 1-2 pm. The shows are all archived on the Cordell Bank sanctuary [website here](#), or you can subscribe to the podcast.

Looking for a good resource online to get ocean wildlife photos for educational use?

Check out the [National Marine Sanctuaries online media library](#)

Download photos and video footage for free for educational use and check out the marine sanctuaries online encyclopedia. There are 4 National Marine Sanctuaries in CA. Do you know which ones are closest to you?

NOAA Resources for you

The folks at the Cordell Bank National Marine Sanctuary and the National Oceanographic and Atmospheric Administration (NOAA) have a variety of resources and opportunities available. Check the opportunities out at <http://cordellbank.noaa.gov>

Planet Bee Foundation

[Planet Bee Foundation](#) is a Bay Area nonprofit dedicated to creating a green-minded generation through environmental stewardship, using the lens of the struggling honey bee to teach the power of individual action. We have expanded our offering of hands-on educational programs, each of which can be individually tailored to fit a school's needs, wants, and location. Every lesson is in line with Next Generation Science Standards and grounded in the philosophy of E-STEM learning. We are now taking sign-ups for the 2018-19 school year! Our calendar fills up quickly, so check out our website at planetbee.org and sign up now!

Planet Bee now offers one-day and year-long programs. The [school program overview page](#) on our website lays out each program offering, their alignment with E-STEM and NGSS, and our updated pricing structure. Need-based discounts and sponsorships are available.

All of our programs are developmentally appropriate and designed to address all learning styles. Most programs involve observation of (contained) live bees, games, hands-on activities, and plenty of room for inquiry, creativity, exploration, and discussion. We focus on conservation techniques and environmentalism in every program.

One-day workshops include: [Humble Honey Bee](#), [Bee-ometry](#), [Native Bees of California](#), [Wanna-Bee an Engineer?](#), [Hive Dive Live](#)

Year-long programs include: [ZomBee Watch](#), [Adopt-A-Hive](#), [Wanna-Bee an Engineer?](#), [Honey Bee Series](#), [Native Bee Series](#), [All Bees Series](#)

We have also added a new format for [High School Programs!](#)

Please email our Program Director, Sarah Thorson, at programs@planetbee.org if you have any questions, or sign up for programs via the online registration forms on our website, www.planetbee.org. Together we can change the world - one bee and one student at a time!

Point Blue (Point Reyes Bird Observatory)

At Point Blue, our mission is to advance the conservation of birds, other wildlife, and ecosystems through science, partnerships, and outreach. Our 140 scientists work to reduce the impacts of habitat loss, climate change, and other environmental threats while promoting nature-based solutions for wildlife and people, on land and at sea.

In addition to the scientific work done by the folks at Point Blue, they have a variety of educational programs. Go to:

<http://www.pointblue.org/>

Sonoma County Wildlife Rescue

Presentations

We love to give educational presentations to groups of all ages! We make each presentation to match your group's unique needs. We can talk on a variety of subjects, including ecology, wildlife rehabilitation, and cohabiting peacefully with wildlife. Presentations may include Powerpoint, skits, games, or specimens.

Tours

Each presentation at SCWR includes a tour of our Educational Wildlife Community. Our community is comprised of non-releasable wildlife in natural enclosures. Animals include mountain lions, coyotes, raccoons, and many more!

If you would like to sign up for one of our presentations, please call (707) 992-0274 or email us at education@scwildliferescue.org.

Web site: <http://www.scwildliferescue.org/presentation-at-scwr.html>

For information, contact Linnaea Furling at: education@scwildliferescue.org or 707-992-0274

Sonoma Resource Conservation District:

Education

LandSmart Education® creates connections and inspires conservation through a series of engaging educational opportunities for community members of all ages. Youth programs offer innovative hands on learning experiences at local farms. A distinctive public outings series highlights local protected agricultural properties and the importance of conservation as a tool in working landscapes in partnership with local landowners. Our annual workshops are designed to deliver cutting edge information and resources about land management techniques available through RCD and partner programs with topics including water management and conservation, fish and wildlife habitat enhancement, erosion control, soil health, and carbon sequestration.

Education programming includes:

- FARMS Leadership Program- high school youth
- TEAM Program field trips- elementary school students
- Agricultural Heritage Series- for members of the public
- LandSmart Workshops- designed for landowners and managers

The California Academy of Sciences, the Exploratorium, and other organizations periodically offer free “Teen Science Night” events. Partners include Space and Science Museum, de Young Museum, Oakland Zoo, San Francisco Zoo, Marine Mammal Center, NASA and others. Do (or have your students do) an Internet search for “Teen Science Night” for upcoming events.

Teen Tech San Francisco

Our mission is to inspire and empower the next generation of tech innovators. TeenTechSF is an interactive tech community for teens to innovate, collaborate, and create. Run by and for teens, all our events are free.

Since launching, TeenTechSF has connected 1,600+ teens on five continents with more than 100 tech leaders from Apple to Zynga offering presentations and workshops on design thinking, coding, app creation, robotics, 3-D printing, entrepreneurship, professional networking, tech careers, and global tech trends.

Like the [TeenTechSF Facebook page](#) for the latest news & events.

See the [TeenTechSF@MarchFor Science video](#) and [TeenTechSF March For Science Facebook recap/photos](#).

This Week in California History...

is a new site for learning about California history, including California’s science and environmental history. ThisWeekinCaliforniaHistory.com is a digital playground for California history and geography. It posts what happened in California over 500 years a week at a time; from natural history to LGBT milestones and including science events like 19th century patents by women in California. The site is free, non-commercial and full of interesting content.

U.S. Forest Service:

You may now order FREE sets of scientist cards from our web site! The cards feature Forest Service scientists and are a great way to introduce students to different science careers. To view the variety of cards we have, please visit <http://www.naturalinquirer.org/scientists-v-92.html>. We also have 2 lesson plans to accompany the cards. These lesson plans are available as pdf files on the web page listed above and the direct links are: <http://www.naturalinquirer.org/UserFiles/File/FinalScientistsCardSeriesLessonPlan.pdf> and [http://www.naturalinquirer.org/UserFiles/File/CardLessonPlans_StealingBundles\(1\).pdf](http://www.naturalinquirer.org/UserFiles/File/CardLessonPlans_StealingBundles(1).pdf).

To order your free sets of cards today, please visit
<http://www.naturalinquirer.org/Scientist-Card-Ordering-Page-v-155.html>.

Wet Gazette

The Water Education Foundation and California Project WET have changed the format for their Web site for water education resources. This excellent source for water education resources includes:

- Trending: What's Happening Now in California Water
- Water Topics: News, Events, and Information by Topic
- Aquaforia: What News You Need to Know
- Aquapedia: An Online Water Encyclopedia
- A Quicklink section giving upcoming events, and resources for purchase

For the spring issue of the Project WET Gazette, go to:

[http://www.watereducation.org/publication/spring-2018-california-project-wet-gazette?utm_campaign=Welcome%20to%20Spring%2C%20California%20Project%20WET%20Alumni%21&utm_medium=email&utm_source=bundle and blast](http://www.watereducation.org/publication/spring-2018-california-project-wet-gazette?utm_campaign=Welcome%20to%20Spring%2C%20California%20Project%20WET%20Alumni%21&utm_medium=email&utm_source=bundle%20and%20blast)

For everyone seeking workshops, we have a variety for you to choose from this summer and a few already posted for the fall at the Foundation's website at [workshops](#) and [Special Workshops and Events](#). We also have lots of non-school related 'Events' for those who just want to get away!

Wildcare/Terwilliger Nature Education Programs

The Wildcare's Terwilliger Nature Education Programs offer a wide range of environmental education opportunities for K-12 classrooms, including:

-Live Wildlife Ambassador Program: Three wildlife ambassadors will visit your classroom for an unforgettable presentation. Possible wildlife visitors include a Northern Spotted Owl, Virginia Opossum, California Desert Tortoise, Red Tailed Hawk, Gopher Snake and many more!

-Nature Hikes: Guided discovery hikes are offered at four locations (Spring Lake, Miwok Meadows, Ring Mountain, Muir Woods)

-Nature Van: Students will explore touchable taxidermy, bones and biofacts in this interactive presentation at your site. Choose from a variety of topics including California Wildlife, Birds of a Feather, Marvelous Mammals, Redwood Giants, Wild Wetlands, Ocean Adventures and Going Green.

-Center Tours: Meet our non-releasable rescued wildlife ambassadors in a guided tour around our outdoor courtyard and museum. Each tour includes a special animal encounter with one of our wildlife ambassadors.

Each classroom automatically qualifies for a scholarship that matches the percentage of the student body enrolled in the Free and Reduced Meal Program.

For more information or for additional teacher resources, visit <http://www.wildcarebayarea.org/education> or email tory@wildcarebayarea.org

WATER WEBSITES OF INTEREST

[Visit the USA](#)

Here you will find lots of great information and tips on visiting and traveling in the USA. No two trips are alike, so you will find information in this section for a variety of trip types. Whether you prefer staying in a resort or camping under the stars, the site includes details travelers need to be safe and happy a trip. Being prepared early and knowing what to expect will help reduce traveler stress and be more able to enjoy the unexpected events of travel. This website has done a lot of the ‘Wet Vacation’ research on states for students – and each state description often includes links to state travel sites that highlight regions within the state, such as the California travel website below.

[Visit California](#)

If you know which part of California is of interest but you still need some guidance, click on “Map,” and then explore one of the 12 geographical regions of the state. We’ve organized our content—including videos, a printed visitor’s guide and even [travel tips](#)—with an eye toward helping find what you want quickly and easily. Searching this site is simple: If you already know what you’re looking for, type the keywords into our search bar at the top of the page. The “hamburger” menu in the top right corner of the page is another great resource—it has links to articles and other content organized around interests.

National Park Service: [Plan Your Visit](#)

Are you ready? Whether you want to explore local places or plan a vacation, you’ll [find a park](#) to suit your interests! The National Park Service preserves unimpaired the natural and cultural resources and values of the National Park System for the enjoyment, education, and inspiration of this and future generations. This is a wonderful website to pair with or expand on ‘*Discover the Waters of Our National Parks*’ (p: 495) or [the California version of the activity!](#)

U.S.G.S. – [The National Map](#)

As one of the cornerstones of the [U.S. Geological Survey’s National Geospatial Program](#), The National Map is a collaborative effort among the USGS and other Federal, State, and local partners to improve and deliver topographic information for the Nation. It has uses ranging from recreation to scientific analysis to emergency response. The National Map Viewer is the one-stop destination for downloading map data and products. It uses easy to navigate foundational base maps and makes it simple to download products such as the US Topo.

[U.S. Climate Data](#)

The purpose of the U.S. Climate Data is to inform people about the climate in the United States. This website was developed by Your Weather Service. The website includes monthly and daily data for temperature, precipitation, snowfall and sunshine for multiple locations in every state. The monthly data also includes a climograph of the average precipitation, maximum and minimum temperature by month for each location that can be opened separately in its own page to copy. Each location also includes Google map link to see where it is located and a link to the current weather forecast at that location. The page also links to [climate.eu](#) where one can find monthly data for countries in Europe and Africa.

NOAA: [U.S. Climate Atlas](#)

These maps use daily observations of temperature and precipitation from over 10,000 stations in the U.S. based on new methodologies to quality control the daily data, summarize the daily data into monthly values and the creation of maps to visualize the information. There are maps for minimum temperature, maximum temperature, and precipitation. There are two types of data that can be displayed; maps for a particular month and year from 1895 to present, or climatology maps. The climatology maps represent average values from 1981 to 2010. These are also known as the “1981-2010 Normals”.

NOAA: [Defining Climate Normals](#)

You’re looking forward to taking a much-deserved vacation in four months, and you want to visit a U.S. city you’ve never been to before. So, how do you decide where to go? Perhaps you’ll consider places where you can expect your ideal temperatures. But, at four months out, your trusted weather forecast probably won’t be much help in finding locations that meet your temperature criteria. Fortunately, our scientists have calculated the “normal” temperatures you can expect to see each month at locations across the United States. We call them [Climate Normals](#), and we compute a new installment every decade.

ESRI: [Severe Weather Public Information Map](#)

Manage your severe weather response with live feeds and sensor data. This map features live feed layers for Severe Weather across the United States and Canada and displays the predicted ice accumulation for the next 72 hours across the Continental United States. Data are updated hourly from the National Digital Forecast Database produced by the National Weather Service.

NOAA: [Climate Data Primer](#)

Heading out for a walk on a chilly spring morning, you notice misty clouds on the hills in the distance. You’re feeling eager for summer to arrive, but the hillsides are just beginning to green up after the end of winter. You wonder, “Is it cooler than usual this spring? I think I’m usually wearing shorts by this time of year.” Thinking about the weather, you recognize what you’re really concerned about is if it will rain on your barbecue this weekend.

NOAA: [Historical Climate Summaries – New Version](#)

The Regional Climate Centers (RCC) deliver climate services at national, regional and state levels working with NOAA partners. The Regional Climate Center data interface is being updated, but you can already start using the new version. Click 'OK' on the note about the page not loading Google Maps correctly, then choose one of the two ways to use the map as described below the map. Click on any data point that appears to get more data than you probably want! This website includes the '30-year normals' used in the U.S. Climate Data locations, the maps in the U.S. Climate Atlas – AND you can get all the raw data available for the life of each gauge on the RCC map!

NOAA: [Comparative Climatic Data](#)

The Comparative Climatic Data tables of meteorological elements outline the climate conditions at major U.S. weather observing stations, Puerto Rico, and the Pacific Islands. The stations list is alphabetically by state. The table arrangement is so a single table of the same element allows the user to compare the values for different locations. Some elements will not be in the table for weather stations that do not regularly report that element. This site also allows users to [view data and graphs of temperature and precipitation Climate Normals](#) for over 9,800 stations across the United States.

US EPA: [Climate Change Indicators: Weather and Climate](#)

Rising global average temperature is associated with widespread changes in weather patterns. Scientific studies indicate that extreme weather events such as heat waves and large storms are likely to become more frequent or more intense with human-induced climate change. This chapter focuses on observed changes in temperature, precipitation, storms, floods, and droughts.

Real World Learning Objects: [Using Excel to Create a Climograph](#)

A climograph is a chart commonly used to graphically display both annual temperature (highs, lows, and averages) and precipitation information for a city or region. Meteorologists and climatologists use climatograms to understand the general climate of a region. They are also frequently included in travel books and tourism brochures so interested visitors can select the "best" time of year to visit a certain location. This website walks one through [how to use a spreadsheet program to create a climograph](#), and then use and analyze the graph to make a recommend times of the year to visit their area of study.

GardenZeus: [California Climate Zones](#)

The same weather and climate factors that may affect vacation plans also come into play when planning what to plant in your garden. GardenZeus California Climate Zones were developed by taking into account many factors including seasonal climate, temperature averages, elevation, frequency of frosts and precipitation. The website includes a wonderful synopsis of the prevailing weather and climate in each of their California climate zones, which upon clicking on shows a list of garden plants recommended for the region.

Desert research Institute: [Stories in the Snow](#)

DRI is pioneering an exciting and unique approach to the science of snow. The Stories in the Snow project engages community members as citizen scientists in real data collection and research throughout the Sierra Nevada. Every snowflake is unique, and the shape of freshly-fallen crystals can tell us about real-time atmospheric conditions. Using smartphone technology, you can help track the path a snowflake has taken through the atmosphere!

[California Project WET Supplemental Materials Page](#)

Remember to check this Water Education Foundation web page to find California specific supplements and other materials for use with Project WET activities, including other activities tied to weather and climate such as the California version of 'Discover the Waters of Our National Parks,' 'Snow and Tell' or 'Back to the Future.'
